## INFORMATION FOR CONTRIBUTORS

Tribal Health Bulletin, a biannual publication on Tribal Health, publishes original papers, review articles, notes and communications on various aspects of tribal health. Authors should submit the typescripts in duplicate neatly typed in double space with a wide margin of at least 4 cm on each side (along with soft copy in a CD-ROM). Articles should be sent together with a certificate that the contribution is the own original work of the author(s) and has not been published or sent for publication elsewhere. Contributors are requested to send their articles, manuscripts, and review material to **the Editor, Tribal Health Bulletin, Regional Medical Research Centre for Tribals (ICMR), Nagpur Road, P.O. Garha, Jabalpur 482003. (M.P.), India. Authors may also submit papers in electronic format to: E.mail: bulletin\_rmrct@yahoo.com.**

The research paper should include (i) title page with running title (ii) abstract (iii) nomenclature of symbols used (iv) tables/figures typed/drawn on separate sheets along with their captions in serial order as they appear in the text. The text of observational and experimental articles is usually (but not necessarily) divided into the following sections: Introduction, Methods, Results, and Discussion. Experimental investigation papers must state in the Methods section that 1) informed consent was obtained from all human adult participants and from parents or legal guardians of minors, with the name of the appropriate institutional review board having approved the project (wherever applicable). 2) the maintenance and care of experimental animals complies with the guidelines for the human use of laboratory animals (wherever applicable). The title page should include: title of the article, authors' names and institutional affiliations, the corresponding author's name, mailing address, telephone and e-mail address. The title should be brief, clear, concise, and should provide broad indication of the content of the paper. An abstract of about 200 words for research papers and about 150 words for review articles should be provided along with the paper. References should be numbered in the order in which they appear in the text. Abbreviate journal names according to the Index Medicus system. At the end of the article, the full list of references should follow in the Vancouver style. (See International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals- [www.icmje.org](http://www.icmje.org)).

### Journal articles

The following information is included for journal articles:

author(s), article title, abbreviated journal title, year, volume number, page numbers.

#### Example:

Halpern SD, Ubel PA, Caplan AL. Solid-organ transplantation in HIV-infected patients. *N Engl J Med*. 2002;347:284-7.

Morgenstern H. The changing association between social status and coronary heart disease in a rural population. *Soc Sci Med*. 1980;14A:191201.

For a journal article written by more than six authors, list the first six authors followed by the phrase 'et al'

### Books / Monographs

The following information is included, in the following order: author(s), book title, edition number (if not the first), city, publisher, year.

Example:

Murray PR, Rosenthal KS, Kobayashi GS, Pfaller MA. *Medical microbiology*. 4th ed. St. Louis: Mosby; 2002.

### Chapter in a book

The following information is included: author(s) cited, chapter title, editor(s), title of the book in which the work appears, city, publisher, year, volume number (if applicable) and page numbers.

Example:

Meltzer PS, Kallioniemi A, Trent JM. Chromosome alterations in human solid tumors. In: Vogelstein B, Kinzler KW, editors. *The genetic basis of human cancer*. New York: McGraw-Hill; 2002. p. 93-113.

### Scientific or technical report

Issued by funding/sponsoring agency: Yen GG (Oklahoma State University, School of Electrical and Computer Engineering, Stillwater, OK). Health monitoring on vibration signatures. Final report. Arlington (VA): Air Force Office of Scientific Research (US), Air Force Research Laboratory; 2002 Feb. Report No.: AFRLSRBLTR020123. Contract No.: F496209810049

### Dissertation

Borkowski MM. Infant sleep and feeding: a telephone survey of Hispanic Americans [dissertation]. Mount Pleasant (MI): Central Michigan University; 2002.

### Conference proceedings

Harnden P, Joffe JK, Jones WG, editors. Germ cell tumours V. Proceedings of the 5th Germ Cell Tumour Conference; 2001 Sep 13-15; Leeds, UK. New York: Springer; 2002.

### Conference paper

Christensen S, Oppacher F. An analysis of Koza's computational effort statistic for genetic programming. In: Foster JA, Lutton E, Miller J, Ryan C, Tettamanzi AG, editors. *Genetic programming. EuroGP 2002: Proceedings of the 5th European Conference on Genetic Programming*; 2002 Apr 3-5; Kinsdale, Ireland. Berlin: Springer; 2002. p. 182-91.

### Electronic Material

CD-ROM

For referencing a CD-ROM, follow the format for a book and indicate the medium in square brackets after the title, i.e. [CD-ROM].

Example:

Anderson SC, Poulsen KB. Anderson's electronic atlas of hematology [CD-ROM]. Philadelphia: Lippincott Williams & Wilkins; 2002.

### Journal article on the Internet

To reference a journal article published on the internet, provide the bibliographic details as for a print journal, with the following additions:

Aboud S. Quality improvement initiative in nursing homes: the ANA acts in an advisory role. *Am J Nurs* [Internet]. 2002 Jun [cited 2002 Aug 12];102(6):[about 1 p.]. Available from: <http://www.Nursingworld.org/AJN/2002/june/Wawatch.htmArticle>

## AN OVERVIEW OF TRIBAL POPULATION IN INDIA

Samiran Bisai<sup>1</sup>, Kalyan B. Saha<sup>2</sup>, Ravendra K Sharma<sup>3</sup>, M. Muniyandi<sup>4</sup> and Neeru Singh<sup>5\*</sup>

### INTRODUCTION

The term 'tribe' originated around the time of Greek and the early formation of the Roman Empire. The Latin term, tribus has since been transformed to identify a group of persons forming a community and claiming descent from a common ancestor (Fried, 1975). The concept of a tribe differs from one scholar to another. Today the range of groups referred to as tribe is truly enormous. Tribes are the people with special attachments to land, kinship ties, unique culture, religious beliefs, material possessions that differentiate and separate them from the mainstream. The origin of India's indigenous people officially called Scheduled Tribe (ST) have been traced to races such as the Proto-Australoids who at one time practically covered the whole of India and the Mongolians who are located mostly in Assam and adjoining states in the north-east region. The Negrito strains are also available as indicated by frizzy hair, among the Andamanese and the Kadars of the south-west India (Memoria, 1957).

The President of India by his special power declared some indigenous groups of our country as 'Scheduled Tribe' in 1950 under Article 342 of the constitution of India. Census records 705 Tribes as STs and among them 75 tribes are recorded as primitive tribal groups (PTGs) (Census of India 2011), mainly based on the criteria of their low level of education, stagnant population growth and primitive economy. Today they are known as Particularly Vulnerable Tribal Group (PVTG) (Ministry of Tribal Affairs, Govt. of India). The tribal societies have remained isolated from the main stream of Indian society. After 66 years of independence, STs are still at the lowest ebb of societal growth.

Forest occupies a central position in the tribal economy and society, without an adequate understanding of the role of forests the problems of tribal development can not be mitigated. In 1982, the Roy Burman committee recommended that 'the intimate complementary of forest and tribal development should gain wide recognition in policies and action'. Unless we modify our forest policies and view, tribes as a subject of curiosity we can not solve the impediments to their development (Bose 1990).

In every five year plan period the impetus on tribal development has been gaining momentum. Different tribal groups in India are at different levels of development. The level of development depends upon a large number of variables, the most important of them being the level of contact with the outside world and the extent of change that has occurred in pertinent cultural elements. The level of socio-economic development of tribals in the western and central regions is very different from that in eastern and southern India (Parasuraman et al, 1990). In general, living a poor quality of life, endogamy and other cultural practices make tribals vulnerable to various diseases particularly of communicable diseases and genetic disorders. Recently, it has been reported that they are also affected by non-communicable diseases like hypertension, cardiovascular disease, etc., which were not reported earlier. The concept of health among them has remained elusive and ill-defined. The tribals are more biased towards body functioning and physical vigour on account of their isolation from the rest of society, their group consciousness and life style. Majority of the tribals believe that 'one who can do hard work and is free from the influences of sprits is not sick'. All these beliefs have kept the tribes away from optimal

utilization of various health service launched by the government from time to time. The three rounds of National Family Health Survey (NFHS) also revealed the under utilization of health services among the tribe.

For successful planning of tribals development, knowledge of their distribution pattern is essential in addition to their social, economic and demographic status. There are studies on population dynamics carried out among urban and rural segments of the Indian population. However, there is a paucity of information on tribal population dynamics within the context of regional milieu. In this document the data from population census has been used to study the distribution of tribal population in India. Such studies will help the academicians and the policy makers in formulating effective developmental programmes to improve the quality of life of tribes. In the present document an attempt has been made to map, illustrate the district wise distribution of the scheduled tribes in the states and union territories of India.

## METHODOLOGY

### Sources of data

In order to count the massive population of India, census of India operating under the Ministry of Home Affairs, Government of India collects data in every ten year interval from all the Indian states and union territories. Data collected includes age, sex, marital status, occupation, work participation, education etc. of population. These parameters include population and its growth rate, literacy rate, density, sex ratio and child sex ratio (0-6 years). In addition, information on community (caste) is also included in the census. The basic data for the present work has been drawn from the census of India 2011.

Forest Survey of India (FSI) is an organization operating under the Ministry of Environment and Forests, Government of India. Its principal mandate is to conduct survey and assess forest resources in the country. In the present documentation, forest data from surveys conducted by FSI during the year 2009-2011 are used (State of the Forest Report, FSI 2011).

Photographs on Tribal population are collected from different sources such as Regional Medical Research Centre for Tribals (RMRCT), other Indian Council of Medical Research (ICMR) institutes and from various websites.

### Data Analysis

Census data was used to compute various indices such as decadal growth rate, sex ratio (number of females per 1000 males), effective literacy rate (7 years and above), dependency ratio and ageing index in the present document.

The dependency ratio is calculated using standard formula :  $\text{Dependency Ratio} = ((P_{0-14} + P_{60+}) / P_{15-59}) * 100$ . The young (0-14 years) and old dependency (60 years and above) ratio is calculated using standard methods. The ageing index is another measure which estimates the ratio of elderly population (60 years or above) to child population (less than 15 years). This ratio calculated as per formula;  $\text{Ageing index} = (P_{60+} / P_{0-14}) * 100$  (Panigrahi 2013). Age and sex specific distribution of ST population of India its States/UTs is presented in tables and population pyramids. A district wise distribution of ST population is also shown in individual state maps. Ranking of individual tribal community was done based on their population size as per census 2001.

## TRIBAL POPULATION IN INDIA

India is the second most populous and the seventh largest (area wise) country in the world. The total geographical area of India is 32,87,263 sq km, of which 6,92,027 sq km is covered by forests, which constitutes 21.1% of its total (Forest Survey of India, 2011). The overall population density of India is 382 per sq km (Census of India, 2011).

### Distribution of tribal population

According to the 2011 Census there are 24,94,54,252 households, of which 2,14,67,179 households belong to ST population. Total population in the country is 1,21,05,69,573, out of these 10,42,81,034 are classified as ST with 5,24,09,823 males and 5,18,71,211 females. Age-sex distribution of tribal and non-tribal population is presented in the population pyramids (Figure 1 & 2). The population pyramid reveals that the sex composition among ST is nearly equal, whereas in non-tribals, it is male preponderance especially in age-groups less than 25 years. However, age structure among tribals is in favour of younger population as compared to non-tribals. The decadal growth rate of the tribal population during 2001-2011 is 23.7% which is higher than India's total decadal growth (17.6%). The tribal population of India constitutes 8.6% of total population of the country and majority of them reside in the rural areas (90%).

State wise percent distribution of tribal population is presented in Map 1. The map clearly indicates that the highest proportion of tribal population resides in north eastern states namely; Mizoram (94.4%), Nagaland (86.5%), Meghalaya (86.1%), Arunachal Pradesh (68.8%), Manipur (35.1%), Sikkim (33.8%) and Tripura (31.8%). Apart from north eastern states tribal population in Lakshadweep islands comprises of 94.8%. Numerically, the highest tribal concentration is in Madhya Pradesh, which is 14.7% of the total tribal population of India (Map 2). Maharashtra (10.1%) and Odisha (9.2%) together add an additional 19.3% tribal population to the country. In contrast, lowest tribal concentration is in UT of Daman and Diu (0.01%). No ST population is recorded in Punjab, Haryana, Chandigarh, Delhi & Puducherry states/UTs.

Sex ratio among tribals in India is 990 females for 1000 males; it is higher than the national sex ratio of 943. Sex ratio among tribals are highest in Goa (1046) and lowest in Jammu and Kashmir (924). The child sex ratio among tribals in India is 957 females for 1000 males. It is highest in Chhattisgarh (993) and lowest in Lakshadweep (907).

Literacy rate among tribals (excluding children aged 0-6 years) are 59%; and it is 68.5% among males and 49.4% among females. Literacy rate in tribal is lower than the national average of about 74%. There is literacy gap of 19.1% between males and females and it is higher in rural area (19.9%) as compared to the urban areas (12.9%). Overall literacy rate among tribal is the highest in Lakshadweep (91.7%) and lowest is Andhra Pradesh (49.2%).

State wise dependency ratio and ageing index among tribals are presented in Table 1. The table shows that overall dependency ratio in India is 73.7%, and is highest in the state of Jammu & Kashmir (93.1%) and lowest in Goa (48.1%). The young and old age dependency ratio is 61.7% and 12%, respectively. Similarly ageing index of India is 19.4%, and it varies from 11.3% in Meghalaya to 42.7% in Goa.

In India, there are around 705 (Census of India, 2011) STs inhabiting in 26 states and 4 union territories. Among them 75 STs are classified as particularly vulnerable tribal group (PVTG) (Map 3). State wise distribution of PVTGs in India is presented in Table 2 & 2A. As per census 2001, in each state

**Map 1: Proportion of tribal population in Indian states****Scheduled Tribe (ST) population (%)**

- A total of 705 distinct tribes reside in India (Census 2011), home to the largest tribal communities in the world (Topal & Samal 2001)
- Three major tribal groups in India are:
  1. Bhil
  2. Gond
  3. Santhal

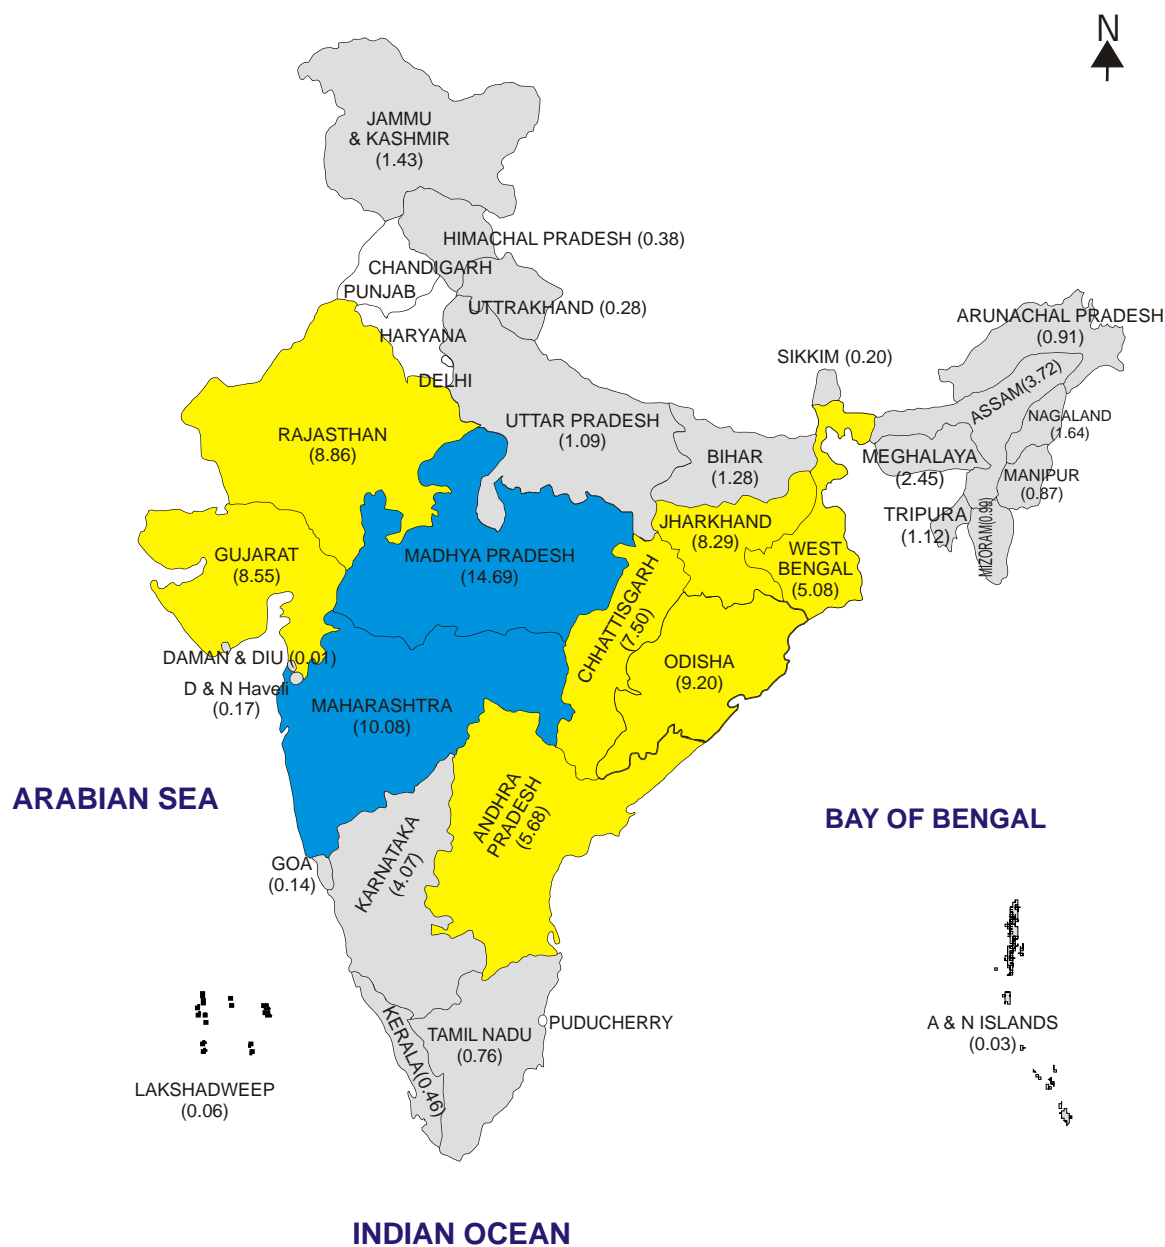

the individual community wise distribution of tribal population is presented in Annexure. The Bhils are the most populous tribe in India (1,26,89,952) followed by the Gonds (1,08,59,422), Santhals (58,38,016), Minas (38,00,002), Naikdas (33,44,954), Oraons (31,42,145), Sugalis (20,77,947), Mundas (19,18,218), Nagas (18,20,965) and Khonds (13,97,384) respectively.

## 1

## ANDHRA PRADESH

Andhra Pradesh is the fourth largest and fifth most populous state of India that lies between latitudes of 12°40'N and 19°50'N and longitudes of 76°45'E and 84°40'E. It is surrounded by Chhattisgarh in the north-west and Maharashtra in the north direction, Tamil Nadu in the south, Karnataka in the west, Orissa in the north-east and coastal area of Bay of Bengal in the east. Total area of the state is 275,045 km<sup>2</sup> of which 16.9% covered by different types of forest (Table 1.1). Population density of Andhra Pradesh is 308 per km<sup>2</sup> which is lower than national average of 382 km<sup>2</sup>.

### Distribution of tribal population

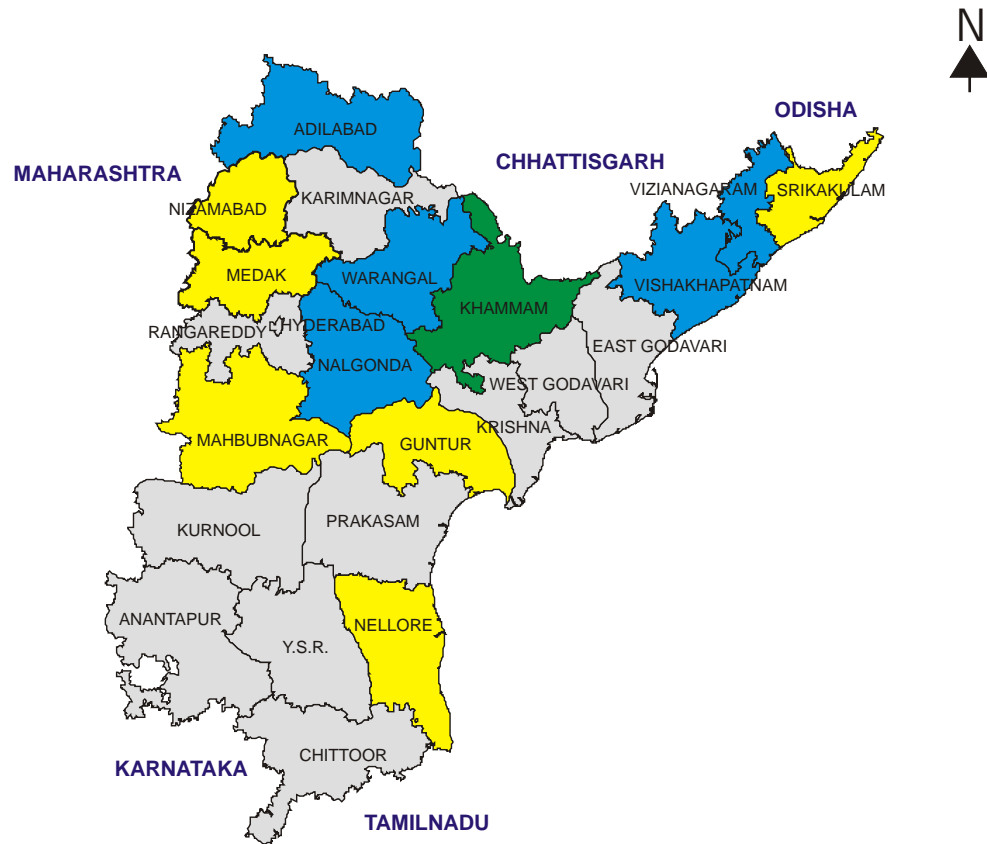

According to census 2011, there are 2,14,67,179 tribal households in the state. Total tribal population in the state is 59,18,073 with males being 29,69,362 and females 29,48,711. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 1.1 & 1.2). The decadal growth rate of the tribal population during 2001-2011 is 17.8 % which is higher than state's decadal growth rate (11%). The tribal population of Andhra Pradesh forms 7% of state's total population and 5.7% of India's total tribal population.

**Table 1.1. District wise distribution of forest area (km<sup>2</sup>)**

Name of District	Geographical Area (GA)	Percentage of State GA	Very Dense Forest	Medium Dense Forest	Open Forest	Total Forest	Percentage of Forest Area

There are 23 districts in Andhra Pradesh state. District wise tribal population is presented in Table 1.2. It shows that Khammam district has the highest tribal concentration in the state, which is 27.4% of the total population of the district and the lowest tribal population in the state is in Hyderabad district (1.2%) (Map 1.1). The district also contributes 13% of the total tribal population of the state and districts Adilabad, Warangal and Visakhapatnam account for another 30%.

Overall sex ratio among tribals are 993 females for 1000 males. The child sex ratio is 931 and it is lowest in Hyderabad district (824) and highest in Vizianagaram district (1010). Literacy rate among tribals are 49.2%; among males it is 58.4% and females 40.1%. Overall tribal literacy rate is lowest in Mahbubnagar district (42.3%) and highest in Hyderabad district (69.3%).

There are 33 scheduled tribes inhabiting the state. Among them, 12 tribal communities are notified as particularly vulnerable tribal group (PVTG). As per census 2001, Sugalis hold first position in terms of their population size (20,77,947). Next to them come the Koyas (5,68,019) and Yenadis (4,62,167).

## 2 ARUNACHAL PRADESH

Popularly known as 'the land of rising sun', Arunachal Pradesh is situated in the north-eastern part of India. The state lies between the latitude of 26°28'N and 29°30'N and longitude of 91°30'E and 97°30'E. Its population density is 17 persons per km<sup>2</sup>. The forest area of the state is 67,410 km<sup>2</sup> which constitutes about 80.5% of its total geographical area (Table 2.1).

### Distribution of tribal population

As per the census 2011, there are 1,76,394 tribal households in the state. Total tribal population in the state is 9,51,821 of which males and females contribute around 49.2% and 50.8% respectively (Table 2.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 2.1 & 2.2). The decadal growth rate of the tribal population during 2001-2011 is 35% which is higher than the state's decadal growth rate (25.9%). The tribal population of Arunachal Pradesh forms 68.8% of state's total population and 0.9% of country's total tribal population.

Presently, the state has 16 districts. Among them, Kurung Kumey has highest tribal concentration in the state, which is about 99% of district's total population (Map 2.1). More than 80% tribal concentration is observed in the Upper Siang, West Siang, Lower Subansiri, Tirap, Upper Subansiri and East Kameng. About 50-80% of population is classified as tribal in Tewang, West Kameng, Papum Pare, East Siang, Dibang Valley and Anjaw districts (Map 2.1). About 30% of state's total tribal population reside in Papum Pare, Tirap and Kurung Kumey districts.

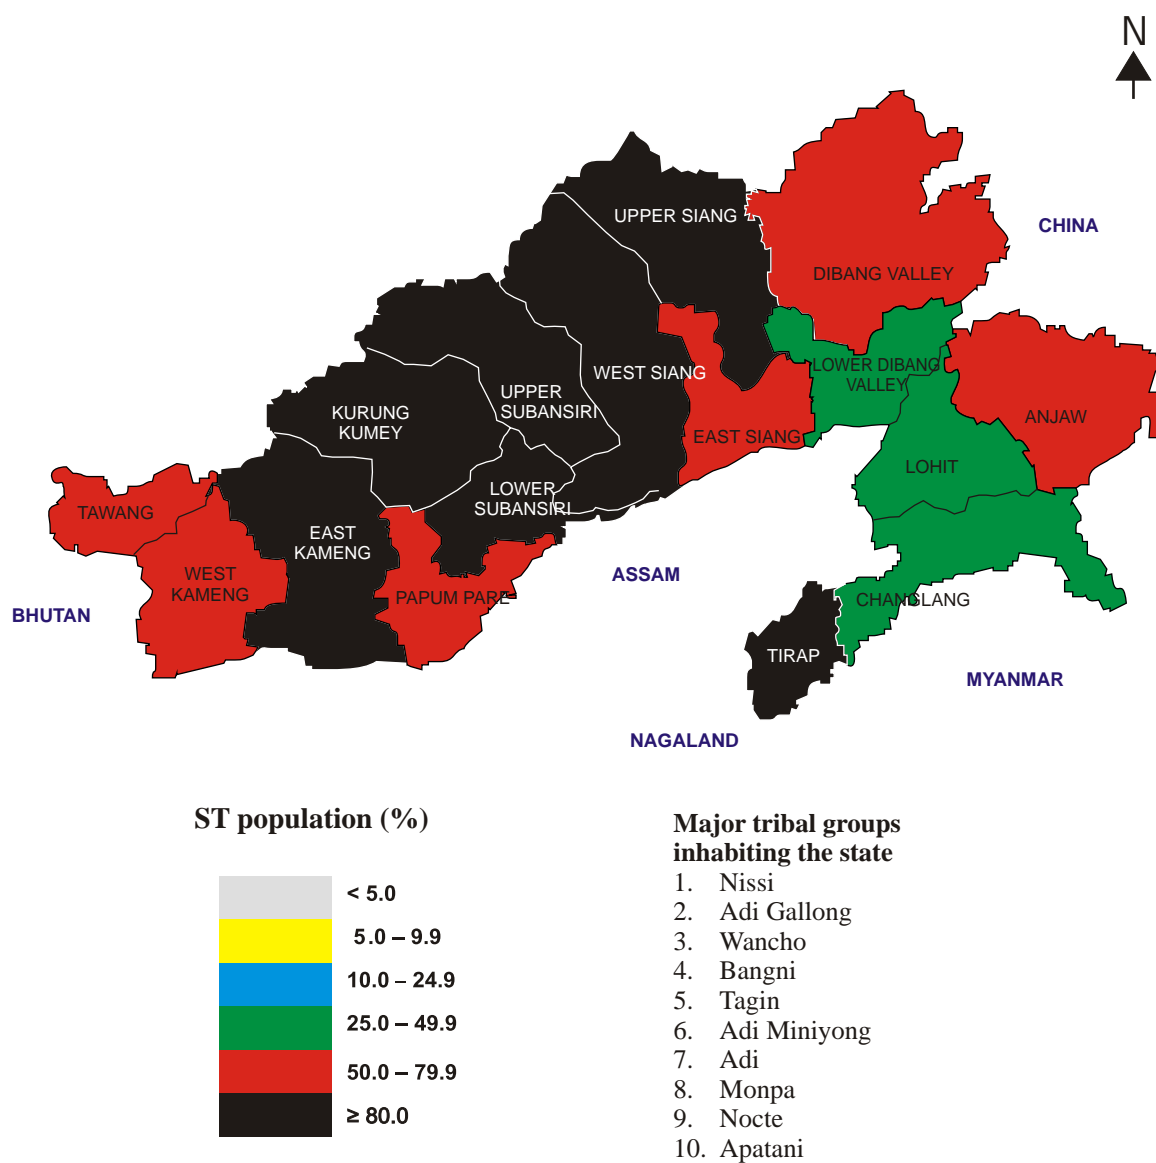

Overall sex ratio among tribals are 1032 females for 1000 males. The child sex ratio is 977; it is lowest in Lohit and Debang Valley district (945) and highest in West Kameng district (1007). Literacy rate among tribals are 64.6%; among male it is 71.5% and for female 58%. Overall literacy rate is lowest in Tirap district (48.5%) and highest in Papum Pare district (79.8%).

There are 98 scheduled tribes inhabiting the state. According to census 2001, Nissi occupy first position in terms of their population size (87,656) followed by the Adi Gallong (48,126) and Wancho (47,788).

### 3 ASSAM

Assam is situated in the middle of the north-eastern part of India. The area of the state is 78,438 km<sup>2</sup> which constitutes 2.39% of country's total geographical area. The state lies between latitude of 24°07'N and 28°00'N and longitude of 89°42'E and 96°02'E. The population density of the state is 397 persons per km<sup>2</sup>. The total forest area of the state is 27,673 km<sup>2</sup> which is 35.3% of its total geographical area (Table 3.1).

#### Distribution of tribal population

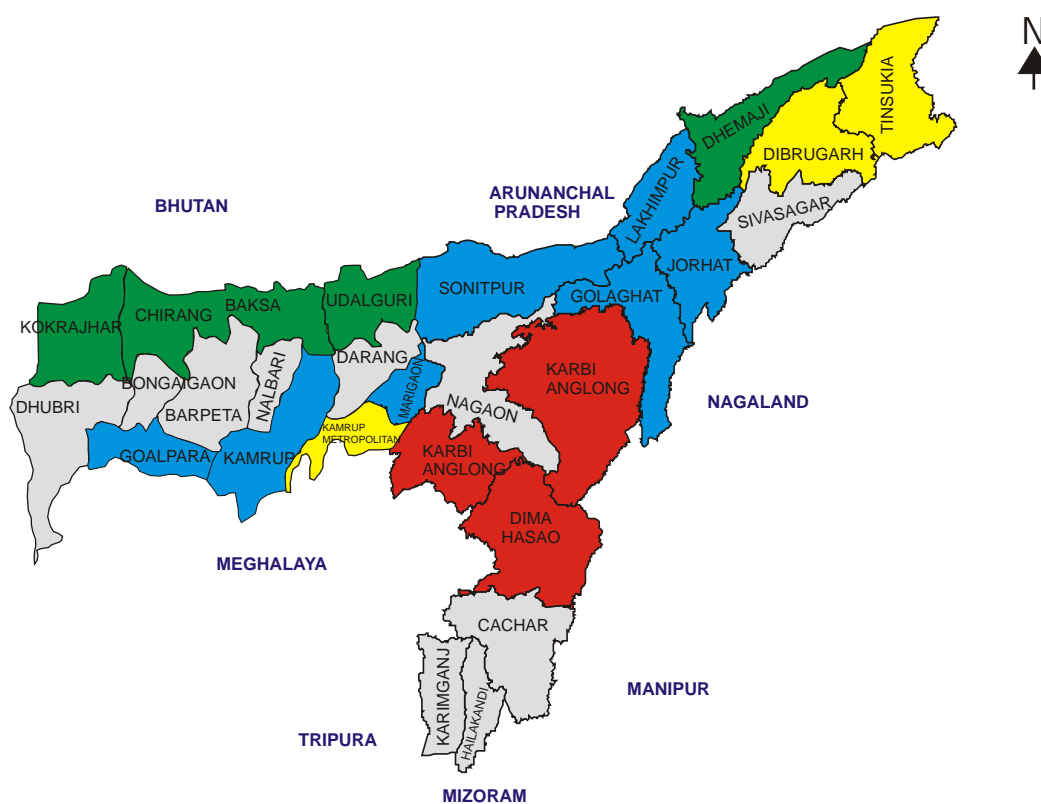

According to census 2011, there are 7,55,194 tribal households in the state. Total tribal population in the state is 38,84,371 with 19,57,005 males and 19,27,366 females (Table 3.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 3.1 & 3.2). The decadal growth rate of the ST population during 2001-2011 is 17.4 % which is higher than state's decadal growth rate (16.9%). The tribal population of Assam forms 12.4% of state's total population and 3.72% of India's total tribal population.

Out of 27 districts in the state, Karbi Anglong and Dima Hasao districts have highest tribal concentration which is 56.3% and 70.9% of the total population of the district (Map 3.1). District Karbi Anglong contributes about 14% to the state's tribal population. Overall sex ratio among tribals are 985. The child sex ratio is 958, it is lowest in Karimganj district (867) and highest in Dhubri district (1016). Literacy rate among tribals are 72.1% including 79% among males and 65.1% among females. The literacy rate is lower in Sonitpur district (64.5%) and higher in Dibrugarh district (89%).

## BIHAR

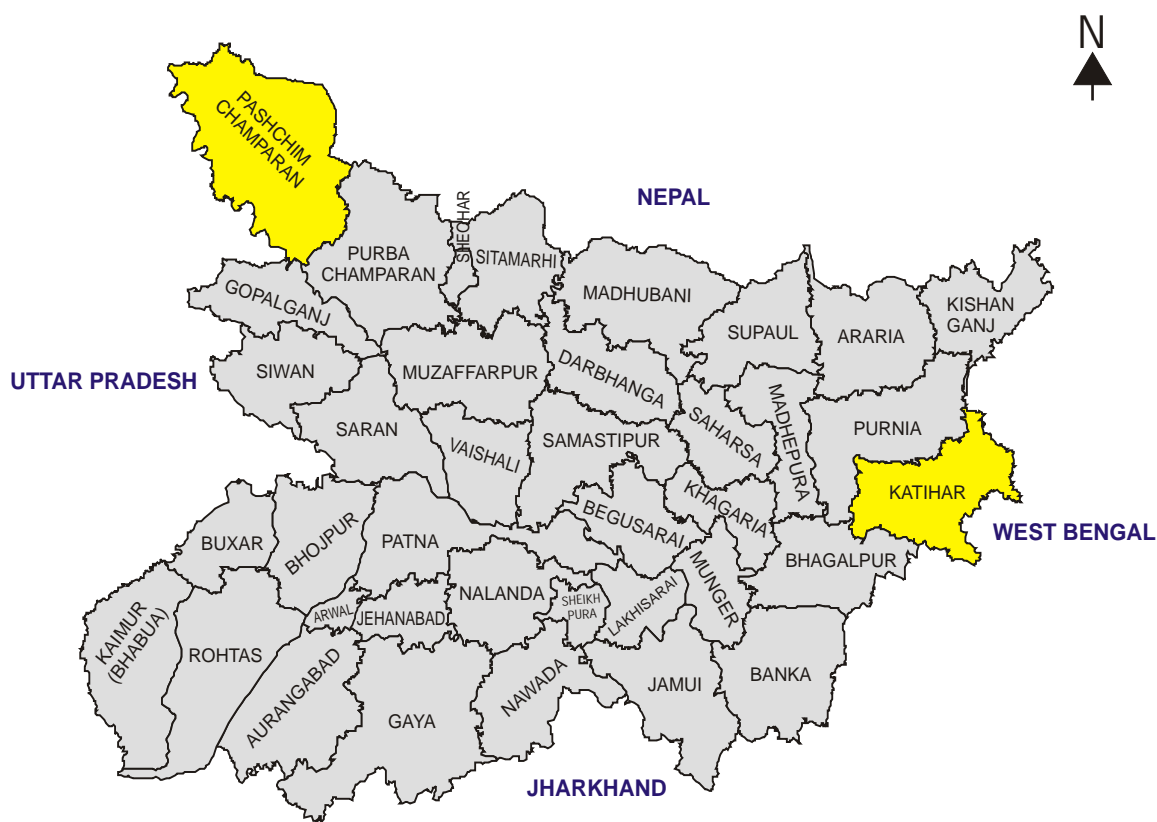

Bihar is the third most populous state in India and is situated in the eastern part of India. The area of the state is 94,163 km<sup>2</sup> which constitutes 2.86% of country's total geographical area. The state lies between the latitude of 24°16'N and 27°45'N and longitude of 83°16'E and 88°30'E. The population density of the state is 1102 persons per km<sup>2</sup>. The forest area of the state is 6,845 km<sup>2</sup> which constitutes 7.3% of its geographical area (Table 4.1).

#### **Distribution of tribal population**

According to census 2011, there are 2,51,749 tribal households in the state. Total tribal population in the state is 13,36,573, among them number of males and females are 6,82,516 and 6,54,057 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 4.1 & 4.2). The decadal growth rate of the tribal population during 2001-2011 is 76.2 % which is higher than the state's decadal growth rate of 25.1%. The tribal population of Bihar forms 1.3% of state's total population and 1.3% of India's total tribal population.

Bihar has 38 districts and its district wise tribal population is presented in Table 4.2. Districts with the highest tribal concentration are Pashchim Champaran and Katihar, which is 6.35% and 5.86% of district's total population (Map 4.1). Districts Pashchim Champaran and Katihar contribute more than 30% to the state's tribal population. Overall sex ratio among tribals are 958 females for 1000 males. The child sex ratio is 969; it is lowest in Vaishali district (843) and highest in Arwal district (1243). Literacy rate among tribals are 51.1% with 61.3 % among males and 40.4% among females. It is lowest in Nawada district (31.1%) and highest in Begusarai district (73.3%).

There are 29 scheduled tribes inhabiting the state. Among them, 9 tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Santals hold first position in terms of their population size (3,67,612) followed by the Oraons (1,20,362) and Kharwars (1,00,735).

## 5 CHHATTISGARH

Chhattisgarh is young and 28<sup>th</sup> state of India. The state lies between latitude of 17°47'N and 24°06'N and longitude of 80°15'E and 84°24'E. Its population density is 189 persons per km<sup>2</sup>. The forest area of the state is 55,674 km<sup>2</sup> which constitutes 41.2% of state's geographical area (Table 5.1).

### Distribution of tribal population

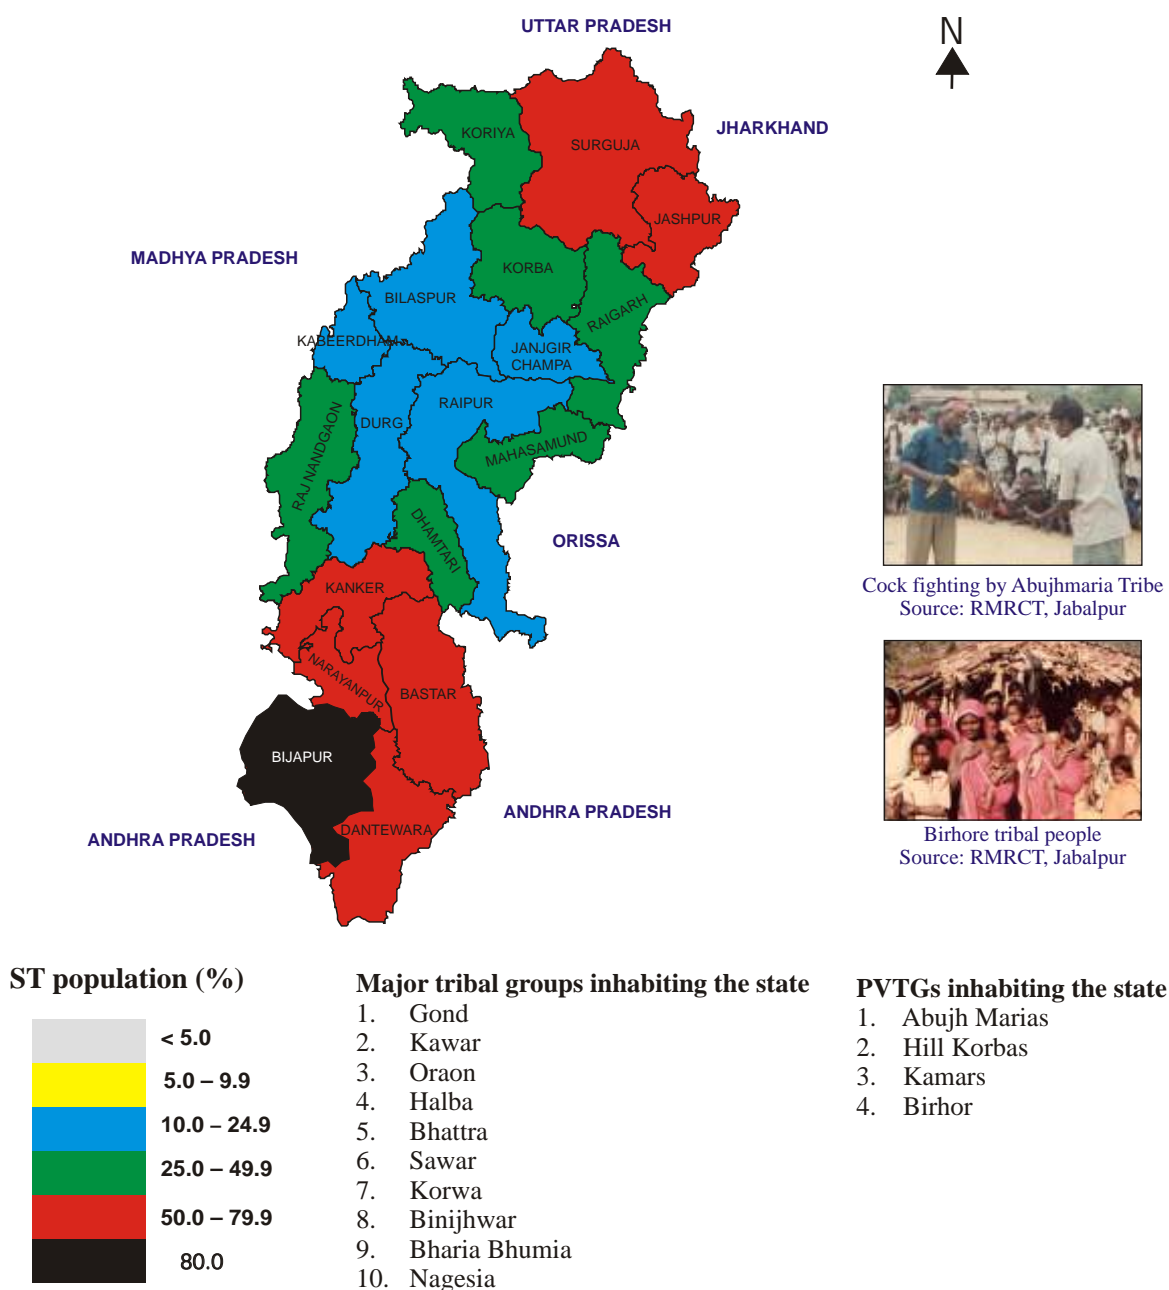

According to census 2011, there are 17,43,277 tribal households in the state. Total tribal population in the state is 78,22,902 which includes 38,73,191 males and 39,49,711 females (Table 5.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 5.1 & 5.2). The decadal growth rate of the ST population during 2001-2011 is 18.2% which is lower than the state's decadal growth rate (22.6%). The tribal population of Chhattisgarh forms 30.6% of state's total population and 7.5% of India's total tribal population.

As per the census 2011, the state has 18 districts. The Bijapur district has the highest tribal concentration in the state being 80% of district's total population (Map 5.1). Districts Surguja and Bastar contribute about 28% to the state's tribal population. Other districts such as Uttar Bastar Kanker, Narayanpur, Sarguja, Bastar, Dakshin Bastar, Jashpur and Dantewada districts have high tribal concentration in the state which is about 50-80% of district's total population. Overall sex ratio among tribals are 1020. The child sex ratio is 993; it is lowest in Janjir-Champa district (952) and highest in Kabeerdham district (1017). Literacy rate among tribals is 59.1% with 69.7% among males and 48.8% among females. It is lowest in Dakshin Bastar and Dantiwada districts (32.9%) and highest in Durg district (76.6%).

## 6 GOA

Goa is the smallest state and situated in the western coast of India. The state lies between latitude of 14°53'N and 15°40'N and longitude of 73°40'E and 74°21'E. The population density of the state is 394 persons per km<sup>2</sup>. The forest area of the state is 2219 km<sup>2</sup> which constitutes 59.9% of state's total geographical area (Table 6.1).

### Distribution of tribal population

According to census 2011, there are 32,067 tribal households in the state. Total tribal population in the state is 1,49,275 of which males and females are 72,948 and 76,327 in numbers respectively (Table 6.2). Age-sex distribution of tribal and non-tribal population is presented in the population pyramids (Figure 6.1 & 6.2). The decadal growth rate of the state is 8.2%. The tribal population of Goa contributes 10.2% of state's total population and 0.14% of India's total tribal population.

Presently, Goa has two districts South Goa and North Goa. South Goa district has the highest tribal concentration (14%) in the state which is about 62% of the total tribal population of the state (Map 6.1). Total sex ratio among tribals is 1046. The child sex ratio is 969. It is comparatively lower in North Goa district than the South Goa. Overall literacy rate among tribals is 79.1%, among males and females it is 87.2% and 71.5% respectively.

There are five scheduled tribes inhabiting the state. According to census 2001, Dublas hold first position in terms of their population size (188) followed by the Siddis (155), Naikdas (143), Varli (31) and Dhodia (16).

## 7 GUJARAT

Gujarat state is situated in the western coast of the country. The state lies between the latitude of 20°07'N and 24°43'N and longitude of 68°10'E and 74°29'E. Its population density is 308 persons per km<sup>2</sup>. The recorded forest area of the state is 14,619 km<sup>2</sup> which constitutes 7.5% of state's total geographical area (Table 7.1).

### Distribution of tribal population

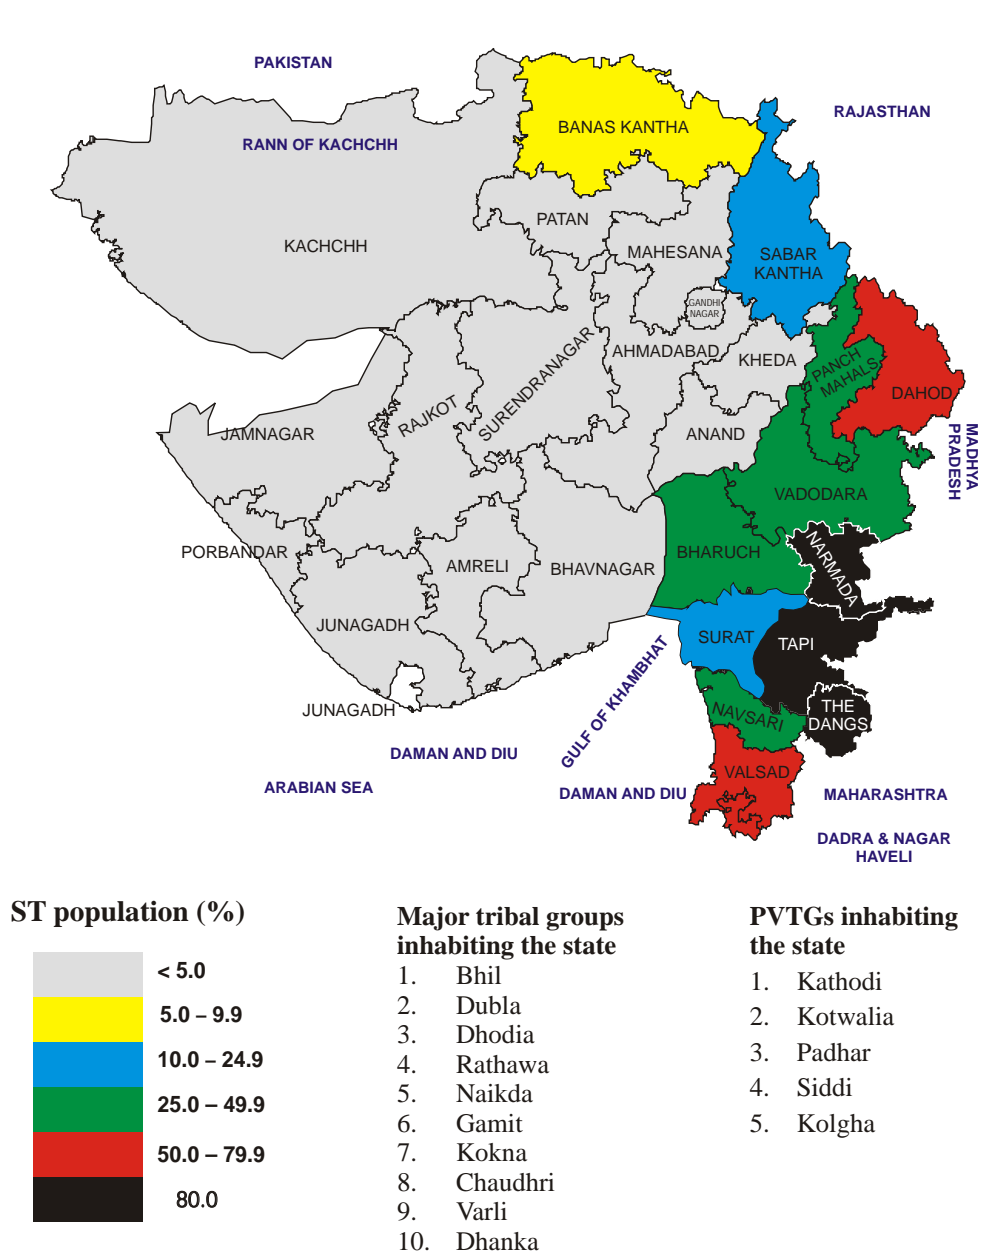

According to census 2011, the recorded tribal household in the state is 16,99,510. Total tribal population in the state is 89,17,174 which includes 45,01,389 males and 44,15,785 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 7.1& 7.2). The decadal change (2001-2011) in population of the state and tribal population is identical (19.2%). The tribal population of Gujarat forms 14.8% of total population of the state and 8.9% of India's total tribal population.

Presently, there are 26 districts in the state. District wise tribal population is presented in Table 7.2. Districts Narmada, Tapi, and The Dangs have very high tribal concentration in the state, which is

## 8 HIMACHAL PRADESH

Himachal Pradesh is situated in the western part of Himalayas in India. The surrounding states of Himachal Pradesh are Jammu & Kashmir, Punjab, Haryana and Uttar Pradesh. The area of the state is 55,673 km<sup>2</sup>, and lies between the latitude of 30°22'N and 33°12'N and longitude of 75°45'E and 79°04'E. Its population density is 123 persons per km<sup>2</sup>. The forest area of the state is 14,679 km<sup>2</sup> which constitutes 26.4% of state's total geographical area (Table 8.1).

### Distribution of tribal population

According to census 2011, there are 80,678 households in the state. Total tribal population in the state is 3,92,126 with 1,96,118 males and 1,96,008 females (Table 8.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 8.1 & 8.2). The decadal growth rate of the tribal population during 2001-2011 is 60.3% which is higher than state's decadal growth rate (12.8%). The tribal population of Himachal Pradesh forms 5.7% of state's total population and 0.38% of India's total tribal population.

The state has 12 districts. Lahul & Spiti district have highest tribal concentration in the state which is more than 80% of districts total population (Map 8.1). Districts Chamba, Kangra and Kinnaur contributes about 67% to the state's tribal population.

Overall sex ratio among tribal is 999. The child sex ratio is 930; it is lowest in Una district (842) and highest in Lahul & Spiti district (1023). Literacy rate among tribal is 73.6% and among males and

## 9

## JAMMU &amp; KASHMIR

Jammu & Kashmir is situated in the northern part of India sharing international borders with Afghanistan, Pakistan, China and Tibet. The area of the state is 2,22,236 km<sup>2</sup>. The state lies between the latitude of 32°17'N and 37°05'N and longitude of 72°31'E and 80°20'E. The population density of the state is 56 persons per km<sup>2</sup>. The forest area of the state is 22,539 km<sup>2</sup> which constitutes 10.1% of state's total geographical area (Table 9.1).

### Distribution of tribal population

According to census 2011, there are 2,60,401 tribal households in the state. Total tribal population in the state is 14,93,299 among them males and females are 7,76,257 and 7,17,042 respectively (Table 9.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 9.1 & 9.2). The decadal growth rate of the ST population during 2001-2011 is 35%, which is higher than state's decadal growth rate (23.7%). The tribal population of Jammu & Kashmir forms 11.9% of state's total population and 1.43% of India's total tribal population.

Jammu & Kashmir has 22 districts. Kargil district has the highest tribal concentration in the state which is more than 80% of district's total population (Map 9.1). Districts Rajouri, Punch and Kargil contribute about 35% to the state's tribal population.

In the state, overall sex ratio among tribal is 924. The child sex ratio is 912, it is lowest in Ganderbal district (871) and highest in Badgam district (985). Literacy rate among tribal is 50.6% and 60.6% and 39.7% among males and females respectively. It is lower in Kulgam district (27.9%) and higher in Leh (Ladakh) district (71.8%).

There are 12 scheduled tribes inhabiting the state. According to census 2001, Gujjars hold first position in terms of their population size (7,63,806) followed by the Bots (96,698) and Bakarwals (60,724).

## 10 JHARKHAND

The area of the Jharkhand state is 79,714 km<sup>2</sup> which constitutes 2.4% of country's total geographical area. The state lies between latitude of 22°00'N and 24°37'N and longitude of 83°15'E and 87°01'E. Its population density is 414 persons per km<sup>2</sup>. The forest area of the state is 22,977 km<sup>2</sup> which constitutes 28.8% of state's total geographical area (Table 10.1).

### Distribution of tribal population

According to census 2011, there are 16,99,215 tribal households in the state. Total tribal population in the state is 86,45,042. It includes 43,15,407 male and 43,29,635 female tribals (Table 10.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 10.1 & 10.2). The decadal growth rate of the ST population during 2001-2011 is 22% which is higher than state's decadal growth rate (22.3%). The tribal population of Jharkhand contributes 26.2% to state's total population and 8.3% of country's total tribal population.

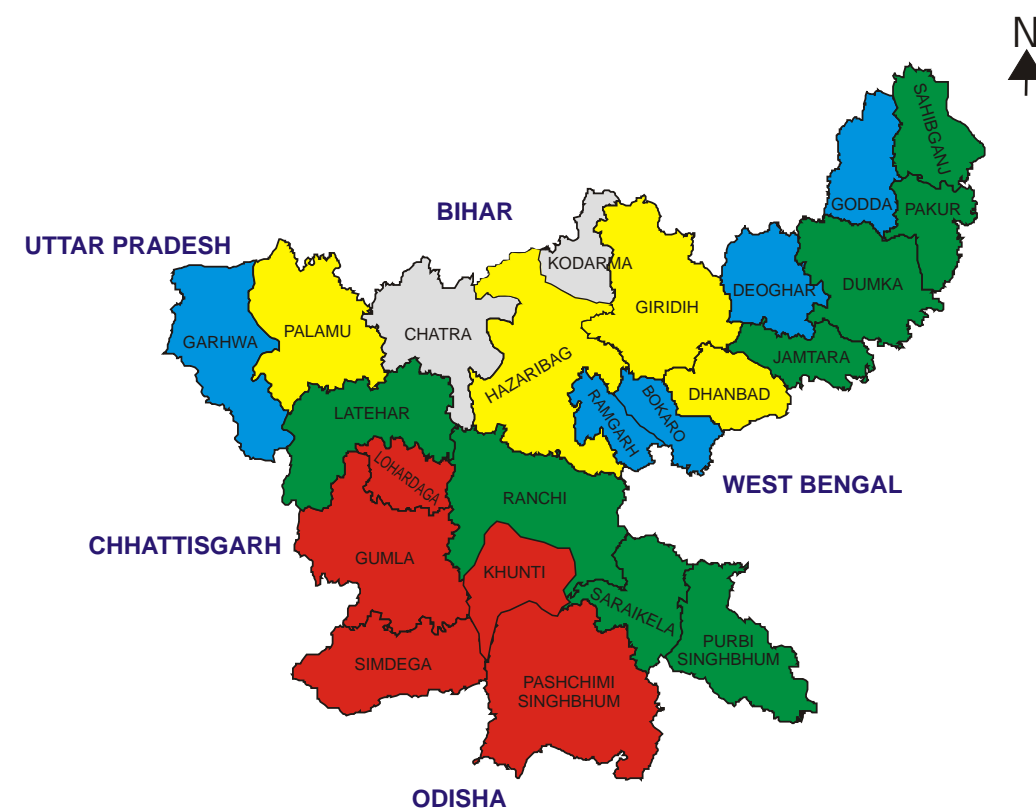

There are 24 districts in Jharkhand. Districts Lohardaga, Gumla, Khunti, Simdega, West Singhbhum have high tribal concentration in the state which lies between 50-80% of district's total population (Map 10.1). Districts Ranchi, Gumla and Dumka contribute about 27% to the state's tribal population.

The overall sex ratio among tribals are 1003. The child sex ratio is 976; it is lowest in Kharsawan district (964) and highest in Kodarma district (1017). Literacy rate among tribals are 57.1% with 68.2%

## 11 KARNATAKA

Karnataka is situated in southern peninsular part of India. The area of the state is 1,91,791 km<sup>2</sup> which constitutes 5.8% of country's total geographical area. The state lies between the latitude of 11°30'N and 18°25'N and longitude of 74°10'E and 78°35'E. The population density of the state is 319 persons per km<sup>2</sup> and forest area is 36,194 km<sup>2</sup> which constitutes 18.9% of state's total geographical area (Table 11.1).

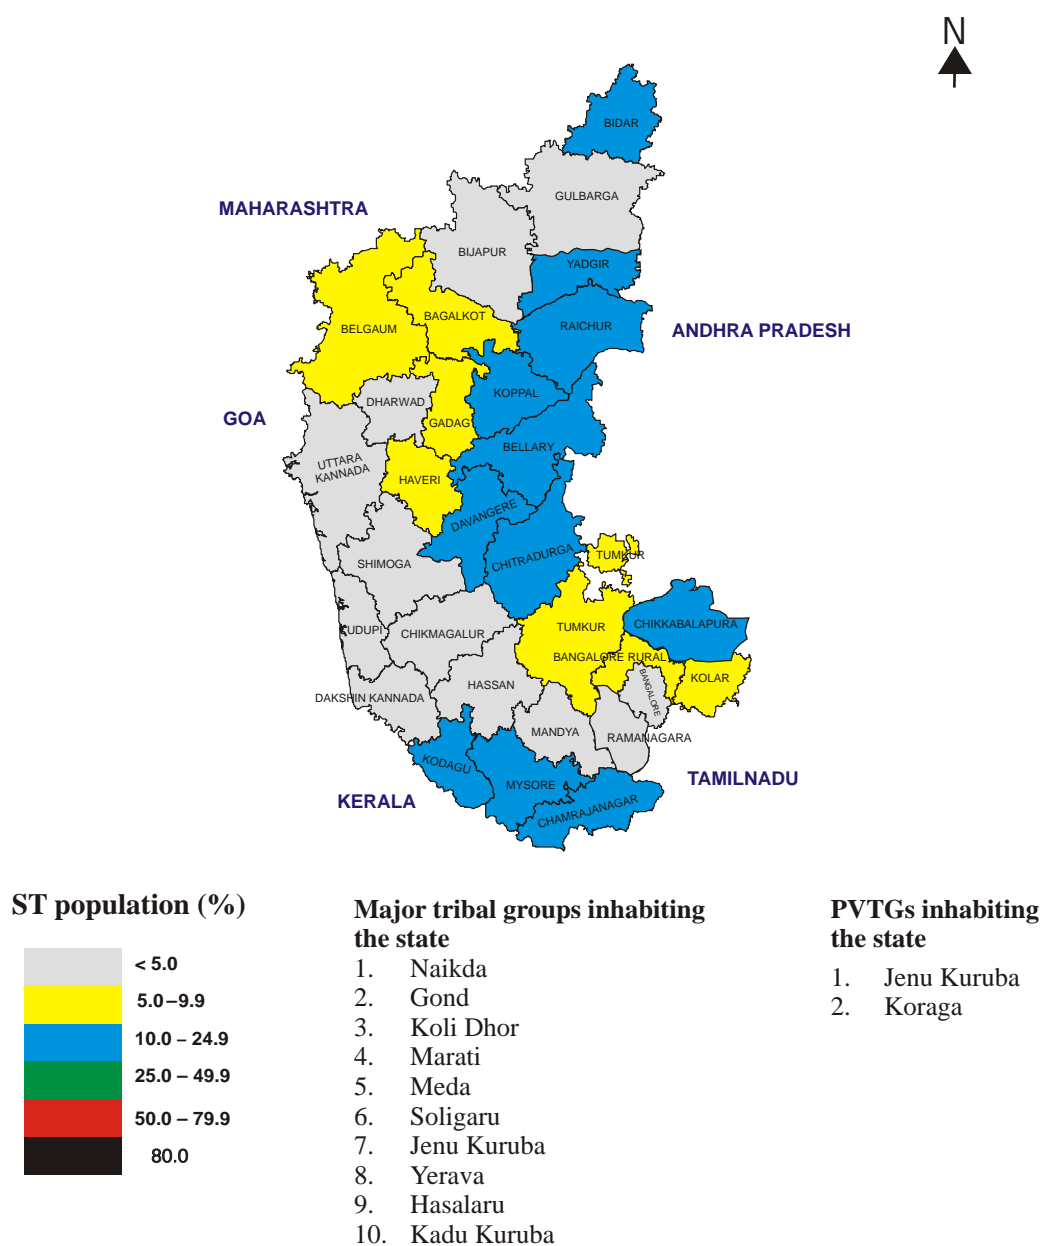

### Distribution of tribal population

According to census 2011, there are 8,75,742 tribal households in the state. Total tribal population in the state is 42,48,987 among them number of males and females are 21,34,754 and 21,14,233 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 11.1 & 11.2). The decadal growth rate of tribal population during 2001-2011 is 22.7% which is higher than the state's decadal growth rate (15.7%). The tribal population of Karnataka forms 7.0% of state's total population and 4.1% of India's total tribal population.

Jenu Kuruba  
Source: orangecounty.in

Karnataka has 30 districts. Its district wise tribal population is presented in Table 11.2. Districts with highest tribal concentration in the state are Yadgir, Raichur, Koppal, Bellary, Dabanagere, Chitradurga, Chikkabailapur, Kodagu, Mysore, Chamarajanagar; which is about 10-25% of district's total population (Map 11.1). Districts Bellary, Raichur, Mysore and Chitradurga contribute more than 34% to the state's tribal population.

Overall sex ratio among tribals are 990. The child sex ratio is 964, it is lowest in Mandya district (896) and highest in Hassan district (1112). Literacy rate among tribals are 62.1% with 71.1% among males and 53% among females. Overall literacy rate is low in Yadgir district (43.6%) and high in Bangalore district (81.1%).

There are 49 scheduled tribes inhabiting the state. Among these two tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Naikdas hold first position in terms of their population size (29,18,649) followed by the Gonds (1,36,700) and Koli Dhors (80,627).

## 12 KERALA

Kerala is situated in the southern most part of India. The area of this state is 38,863 km<sup>2</sup> which constitutes 9.4% of country's geographical area. The state lies between the latitude of 8°17'N and 12°47'N and longitude of 74°52'E and 77°24'E. The population density is 859 persons per km<sup>2</sup>. The forest area of the state is 17,300 km<sup>2</sup> which constitutes 44.5% of the state's geographical area (Table 12.1).

### Distribution of tribal population

According to census 2011, there are 1,19,788 tribal households in the state. The total tribal population in the state is 4,84,839 including 2,38,203 male and 2,46,636 female population. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 12.1 & 12.2). The decadal growth rate of the ST population during 2001-2011 is 33.1% and it is higher than the state's decadal growth rate (4.9%). The tribal population of Kerala forms 1.5% of state's total population and 0.46% of India's tribal population.

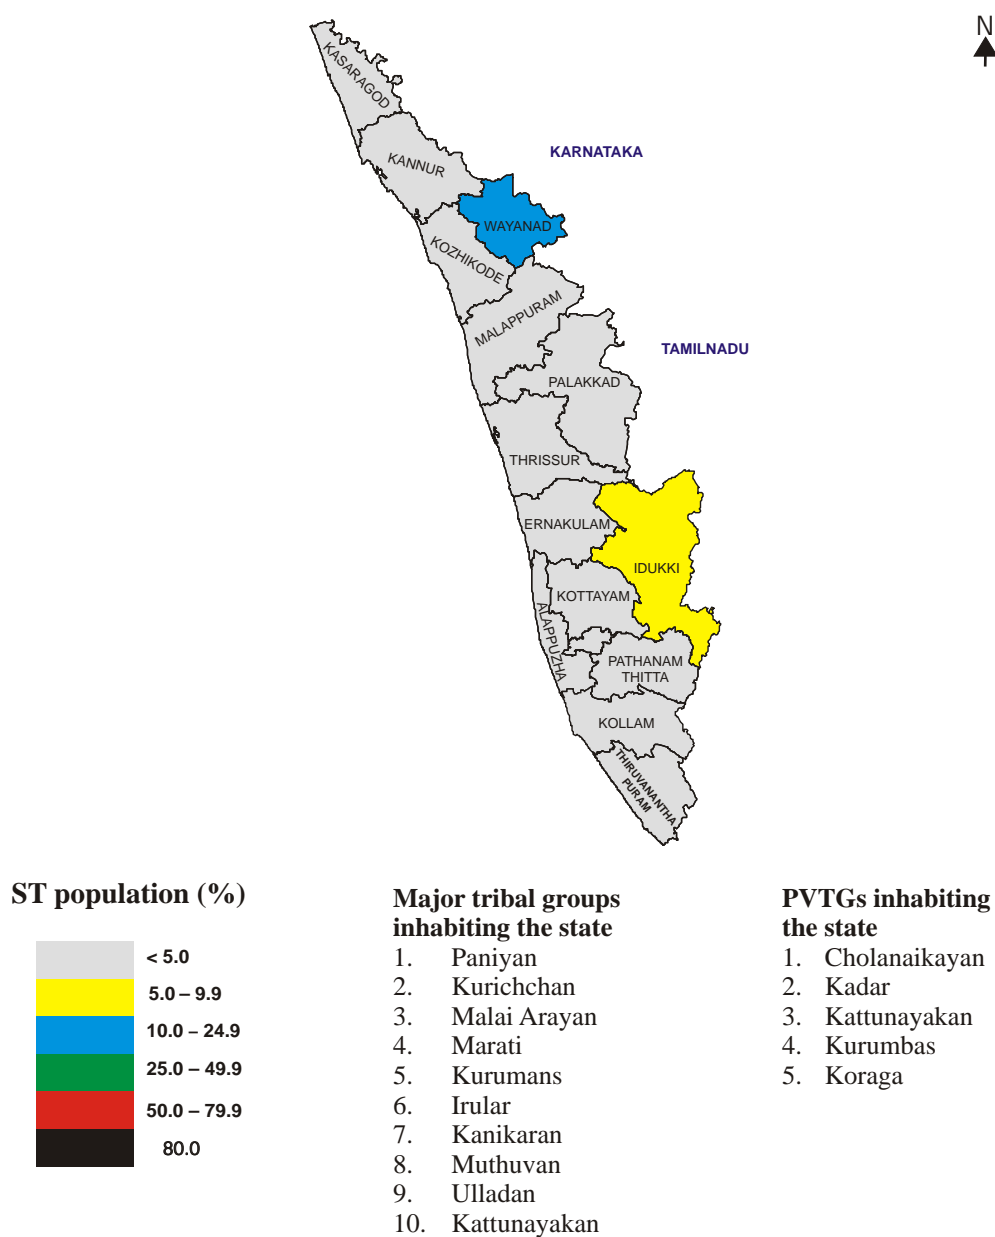

There are 14 districts in the state. District wise tribal population is shown in Table 12.2. Waynad district has the highest tribal concentration in the state which is between 10-25% of district's total population (Map 12.1). Districts Wayanad, Idukki, Palakkad, Kasaragod and Kannur contribute more than 70% to the state's tribal population.

Overall sex ratio among tribals are 1035. The child sex ratio is 949; it is lowest in Alappuzha district (881) and highest in Thrissur district (1053). Literacy rate among tribals are 75.8% with 80.8% and 71.1% among males and females respectively. Overall literacy rate is low in Palakkad district (61.5) and high in Kottayam district (94.3).

## 13 MADHYA PRADESH

Madhya Pradesh is situated in the central region of India. The area of the state is 3,08,245 km<sup>2</sup> which constitutes 9.4% of country's geographical area. The state lies between latitude of 21°17'N and 26°52'N and longitude of 74°36'E and 82°49'E. Its population density is 236 persons per km<sup>2</sup>. The forest area of the state is 77,700 km<sup>2</sup> which constitutes 25.2% of its geographical area (Table 13.1).

### Distribution of tribal population

According to census 2011, there are 31,22,061 total households in the state. Total tribal population in the state is 1,53,16,784 among them males are 77,19,404 and females are 75,97,380 (Table 13.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 13.1 & 13.2). The decadal growth rate of the ST population during 2001-2011 is 25.2 % which is higher than the state's decadal growth rate (20.3%). The tribal population of Madhya Pradesh accounts for 21.1% of state's total population and 14.7% of India's total tribal population.

Presently, Madhya Pradesh has 50 districts. Jhabua and Alirajpur districts have the highest tribal concentration in the state which is more than 80% of district's total population (Map 13.1). Districts Dhar, Barwani, Jhabua and Chhindwara contribute about 25% to the state's tribal population.

Overall sex ratio among tribals are 984. The child sex ratio is 952; it is lowest in Gwalior district (886) and highest in Balaghat district (981). Literacy rate among tribals are 50.6% and among males and females, 59.6% and 41.5% respectively. District with high literacy rate is Balaghat (66.7%). Alirajpur district has the lowest literacy rate (32.4%).

There are 46 scheduled tribes inhabiting the state. Among them, three tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Bhils hold first position in terms of their population size (46,18,068) followed by the Gonds (43,56,918) and Kols (9,55,040).

## 14 MAHARASHTRA

Maharashtra is a second most populous state situated in western India. The area of the state is 3,07,713 km<sup>2</sup> which constitutes 9.36% of country's geographical area. The state lies between the latitude of 15°35'N and 22°02'N and longitude of 72°36'E and 80°54'E. Its population density is 366 persons per km<sup>2</sup>. The forest area of the state is 50,646 km<sup>2</sup> which constitutes 16.5% of state's total geographical area (Table 14.1).

### Distribution of tribal population

According to census 2011, there are 21,56,957 tribal households in the state. Total tribal population in the state is 1,05,10,213 of which males and females are 53,15,025 and 51,95,188 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 14.1 & 14.2). The decadal growth rate of the ST population during 2001-2011 is 22.5% which is higher than the state's decadal growth rate (16%). The tribal population of Maharashtra constitutes 9.4% of state's

total population and 10.1% of India's total tribal population.

Maharashtra has 35 districts and district wise tribal population is presented in Table 14.2. It shows that Nandurbar district has high tribal concentration i.e. 69.3% of district's total population; while Dhule, Gadchiroli and Nasik districts have moderate tribal concentration i.e. between 25-50% of district's total population (Map 14.1). Districts Nashik, Thane, Nandurbar, Dhule and Jalgaon contribute more than 50% to the state's tribal population.

Overall sex ratio among tribals are 977. The child sex ratio is 955; it is lowest in Kolhapur district (870) and highest in Gadchiroli district (985). Literacy rate among tribals are 65.7% and among males and females, 74.3% and 57% respectively. Overall literacy rate is lower in Dhule district (51%) and higher in Mumbai district (83.4%).

## 15 MANIPUR

Manipur is situated in the north eastern part of India. The area of the state is 22,327 km<sup>2</sup> which constitutes about 0.68% of country's geographical area. The state lies between the latitude of 23°50'N and 25°42'N and longitude of 92°59'E and 94°46'E. The population density is 122 persons per km<sup>2</sup>. The forest area of the state is 17,090 km<sup>2</sup> which constitutes 76.5% of its geographical area (Table 15.1).

### Distribution of tribal population

According to census 2011, there are 1,70,287 tribal households in the state (excluding 3 subdivisions of Senapati district). Total tribal population in the state is 9,02,740 of which males and females are 4,50,887 and 4,51,853 respectively (Table 15.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 15.1 & 15.2). The decadal growth rate of ST population during 2001-2011 is 21.8 %, and comparatively higher than the state's decadal growth (18.7%). The tribal population of Manipur forms 35.1% of state's total population and 0.87% of India's tribal population.

The state has 9 districts, and the district wise distribution of tribal population is presented in Table 15.2. Among these 4 districts namely Tamenglong (95.72%), Chandel (88.97%), Churachan (92.94%) and Ukhrul (94.35%) have the high tribal concentration i.e. more than 80% of district's total population. In contrast, lowest tribal concentration is found in Thoubal district (0.43%) (Map 15.1). Districts Churachandpur, Ukhrul, Senapati, Tamenglong and Chandel contribute nearly 94% to the state's tribal population.

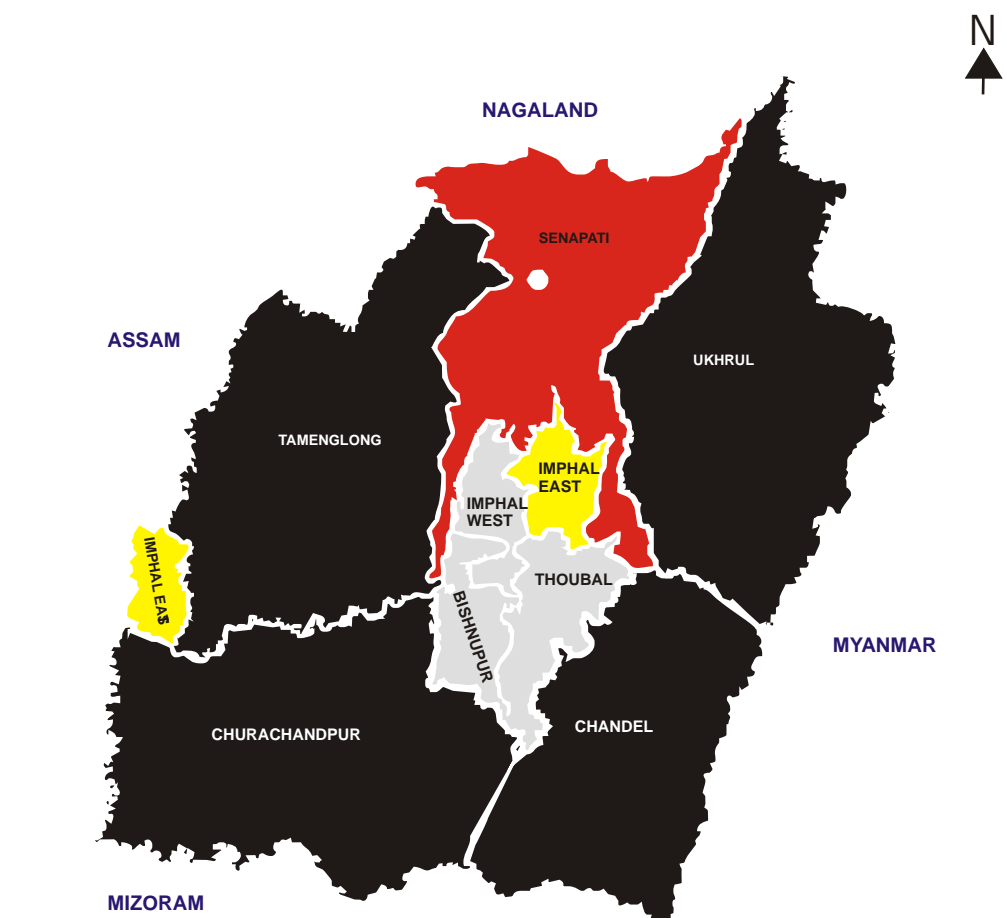

Overall sex ratio among tribals are 1002. The child sex ratio is 934; it is lowest in Bishnupur district (884) and highest in Thoubal district (1011). Literacy rate among tribals are 77.36% and among males and females, 82.1% and 72.7% respectively. It is low in Tamenglong district (69.5%) and high in Imphal East district (89.8%).

There are 29 scheduled tribes inhabiting the state and one tribal community is designated as particularly vulnerable tribal group (PVTG). According to census 2001, Thadous hold first position in terms of their population size (1,82,594) followed by the Tangkhuls (1,46,075) and Kabuls (82,386).

## 16 MEGHALAYA

Meghalaya is situated in the north eastern part of India. The area of the state is 22,429 km<sup>2</sup> which constitutes about 0.64% of country's total geographical area. The state lies between the latitude of 24°58'N - 26°07'N and longitude of 89°48'E - 92°51'E. The population density is 132 persons per km<sup>2</sup>. The forest area of the state is 17,275 km<sup>2</sup> which constitutes 77% of its geographical area (Table 16.1).

### Distribution of tribal population

According to census 2011, there are 4,60,775 tribal households in the state. Total tribal population in the state is 25,55,861 of which males and females are 1269728 and 1286133 respectively (Table 16.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 16.1 & 16.2). The decadal growth rate of the tribal population during 2001-2011 is 28.3%, and marginally higher than the state's decadal growth rate (27.8%). The tribal population of Meghalaya forms 86.1% of state's total population and 2.4% of India's tribal population.

Currently, the state has seven districts; the district wise distribution of tribal population is presented in Table 16.2. All districts excluding West Garo Hills have very high tribal concentration i.e. more than 80% of district's total population (Map 16.1). District East Khasi Hills contributes nearly 26% to the state's tribal population.

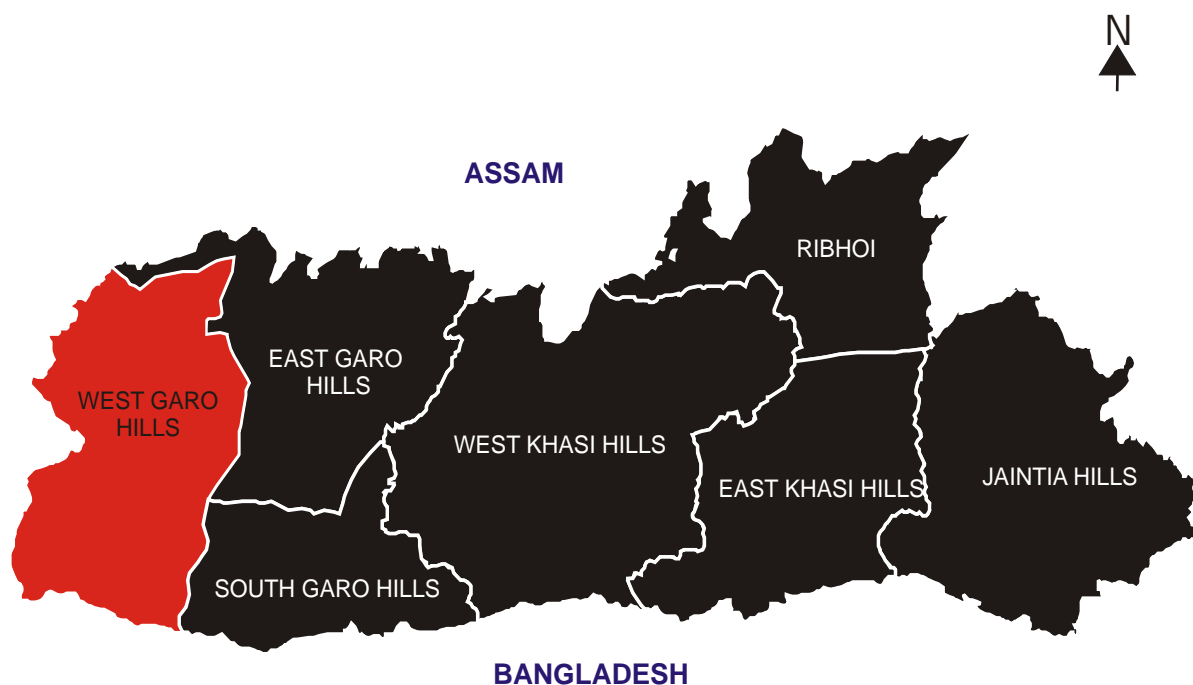

Overall sex ratio among tribal in Meghalaya is 1013. The child sex ratio are 973, it is lowest in Ribhoi district (956) and highest in East and West Garo Hills district (980). Literacy rate among tribals are 74.3% and among males and females, 75.5% and 73.6% respectively. It is lower in Jaintia Hills district (61.5%) and higher in East Khasi Hills district (83.3%).

There are 17 scheduled tribes inhabiting the state. According to census 2001, Khasi including Jaintia, Synteng jointly holds first position in terms of their population strength (11,23,490) followed by the Garos (6,89,639) and Hajongs (31,381).

## 17 MIZORAM

Mizoram state is situated in the north eastern part of India. The area of the state is 21,081km<sup>2</sup> which constitutes about 0.64% of country's geographical area. The state lies between the latitude of 21°56'N and 24°31'N and longitude of 92°16'E and 93°26'E. The population density is 52 persons per km<sup>2</sup>. The forest area of the state is 19,117 km<sup>2</sup> which constitutes 90.7% of its geographical area (Table 17.1).

### Distribution of tribal population

According to census 2011, there are 2,09,154 tribal households in the state. The total tribal population in the state is 10,36,115 with 5,16,294 males and 5,19,821 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 17.1 & 17.2). The decadal growth rate of the ST population during 2001-2011 is 23.4%, higher than the state's decadal growth rate (22.8%). The tribal population of Mizoram forms 94.4% of state's total population and about 1% of India's tribal population.

At present, the state has eight districts, the district wise distribution of tribal population is shown Table 17.2. All districts in the state show very high concentration of tribal population i.e. more than 80% of district's total population (Map 17.1). Aizawl district contributes 36% to the state's tribal population.

Overall sex ratio among tribals are 1007. The child sex ratio is 971; it is lowest in Saiha district (928) and highest in Aizawl district (984). Literacy rate among tribals are 91.5%. The literacy rate for males and females is 93.6% and 89.5% respectively. It is lowest in Lawngtlai district (65.9%) and highest in Aizawl district (98.1%).

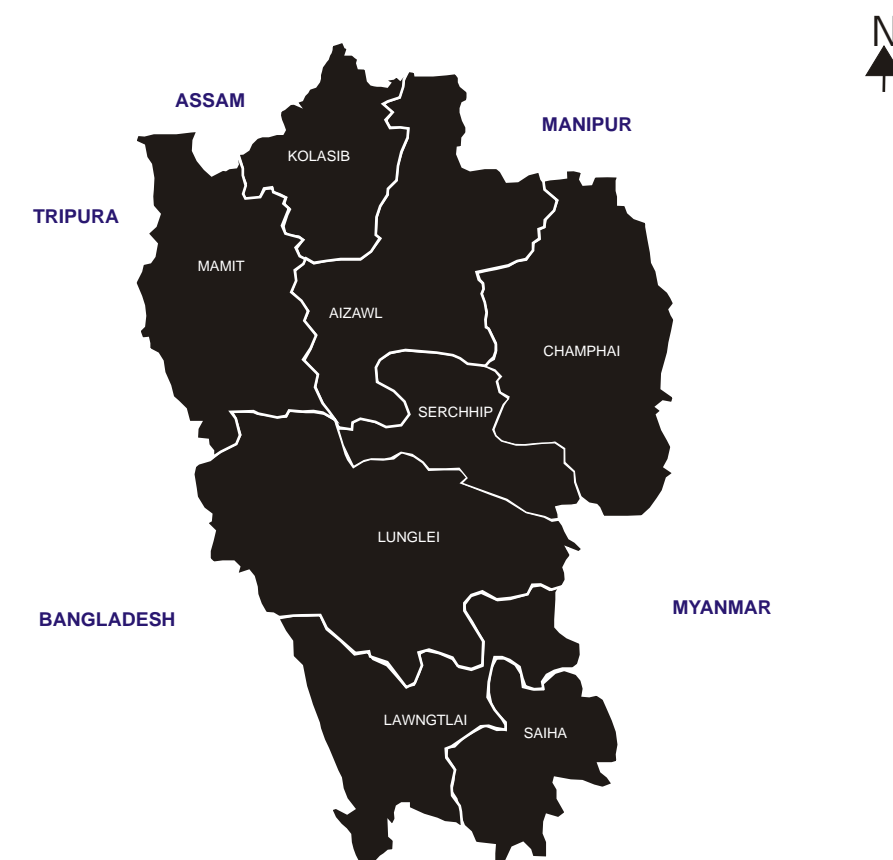

There are 14 scheduled tribes inhabiting the state. According to census 2001, Mizos hold first position in terms of their population size (6,46,117) followed by the Chakmas (71,283) and Pawis (42,230).

## 18 NAGALAND

Nagaland is situated in the north eastern part of India. The area of the state is 16,579 km<sup>2</sup> which constitutes about 4.7% of country's geographical area. The state lies between the latitude of 25°10'N and 27°4'N and longitude of 93°15'E and 25°6'E. The population density is 119 persons per km<sup>2</sup>. The recorded forest area of the state is 13,318 km<sup>2</sup> which constitutes 80.3% of its geographical area (Table 18.1).

### Distribution of tribal population

According to census 2011, there are 3,34,967 tribal households in the state. Total tribal population in the state is 17,10,973 of which males and females are 8,66,027 and 8,44,946 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 18.1 & 18.2). In general a negative decadal growth rate is observed among tribal population during 2001-2011 and it is -3.6%, which is lower than the state's decadal growth rate (-0.5%). The tribal population of Nagaland forms about 86.5% of state's total population and 1.64% of India's tribal population.

The state has 11 districts and the district wise distribution of tribal population is presented in Table 18.2. Almost all districts, except Dimapur, have very high tribal concentration i.e. more than 80% of district's total population (Map 18.1). Districts Mon, Dimapur and Kohima contribute about 40% to the state's tribal population.

Overall sex ratio among tribal is 976. The child sex ratio are 942; it is lowest in Longleng district (889) and highest in Kohima district (985). Literacy rate among tribals are 80% and among males and females, 83.1% and 76.9% respectively. It is lowest in Mon district (56.4%) and highest in Mokokchung district (93.7%).

There are 23 scheduled tribes inhabiting the state. According to census 2001, Nagas hold first position in terms of their population size (17,41,692) followed by the Konyaks (2,43,758) and Semas (2,41,806).

## 19 ODISHA

Odisha state is situated in the eastern coast of the India. The area of the state is 155,707 km<sup>2</sup> which constitutes 4.74% of country's geographical area. The state lies between the latitude of 17°47'N and 22°34'N and longitude of 81°22'E and 87°29'E. The population density is 269 persons per km<sup>2</sup>. The forest area of the state is 48,903 km<sup>2</sup> which constitutes 31.4% of its geographical area (Table 19.1).

### Distribution of tribal population

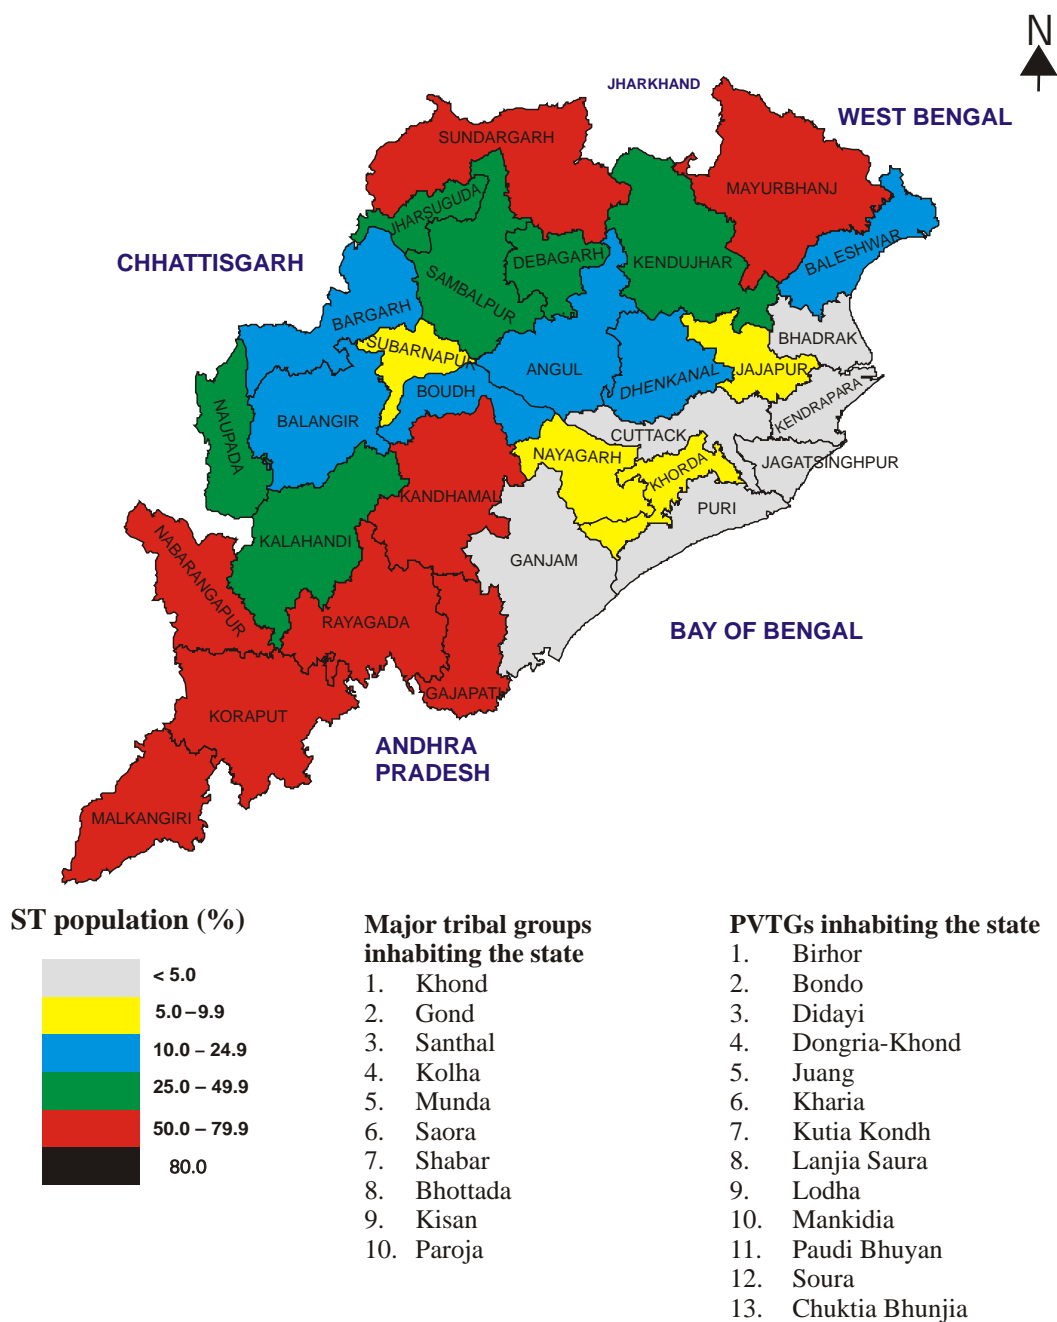

According to census 2011, there are 21,63,110 tribal households in the state. Total tribal population in the state is 95,90,756 of which males and females are 47,27,732 and 48,63,024 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 19.1 & 19.2). The decadal growth rate of the tribal population during 2001-2011 is 17.7 % which is higher than

the state's decadal growth rate (14%). The tribal population of Odisha forms about 22.8% of state's total population and 9.2% of India's tribal population.

Presently, the state has 30 districts and the district wise distribution of tribal population is presented in Table 19.2. Districts Sundargarh, Mayurbhanj, Kandhamal, Nabarangapur, Rayagada, Gajapati, Koraput and Malkaniri have high tribal concentration in the state i.e. 50-80% of district's total population (Map 19.1). Districts Sundargarh, Kendujhar and Mayurbhanj contribute 35% to the state's tribal population.

Overall sex ratio among tribals are 1029. The child sex ratio is 980, it is the lowest in Jagatsinghpur district (859) and the highest in Kendrapara district (1025). Literacy rate among tribals are 52.2%, and it is 63.7% and 41.2% among males and females respectively. Literacy is lower in Malkangiri district (33.2%) and higher in Puri district (74.6%).

There are 62 scheduled tribes inhabiting the state. Among them, 13 tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Khonds hold first position in terms of their population size (13,95,643) followed by the Gonds (7,82,104 ) and Santals (7,77,204).

## 20 RAJASTHAN

Rajasthan state is situated in the north-western part of India. The area of the state is 342,239 km<sup>2</sup> which constitutes 10.4% of country's geographical area. The state lies between the latitude of 23°04'N and 30°11'N and longitude of 69°29'E and 78°17'E. The population density is 201 persons per km<sup>2</sup>. The forest area of the state is 16087 km<sup>2</sup> which constitutes 4.7% of its geographical area (Table 20.1).

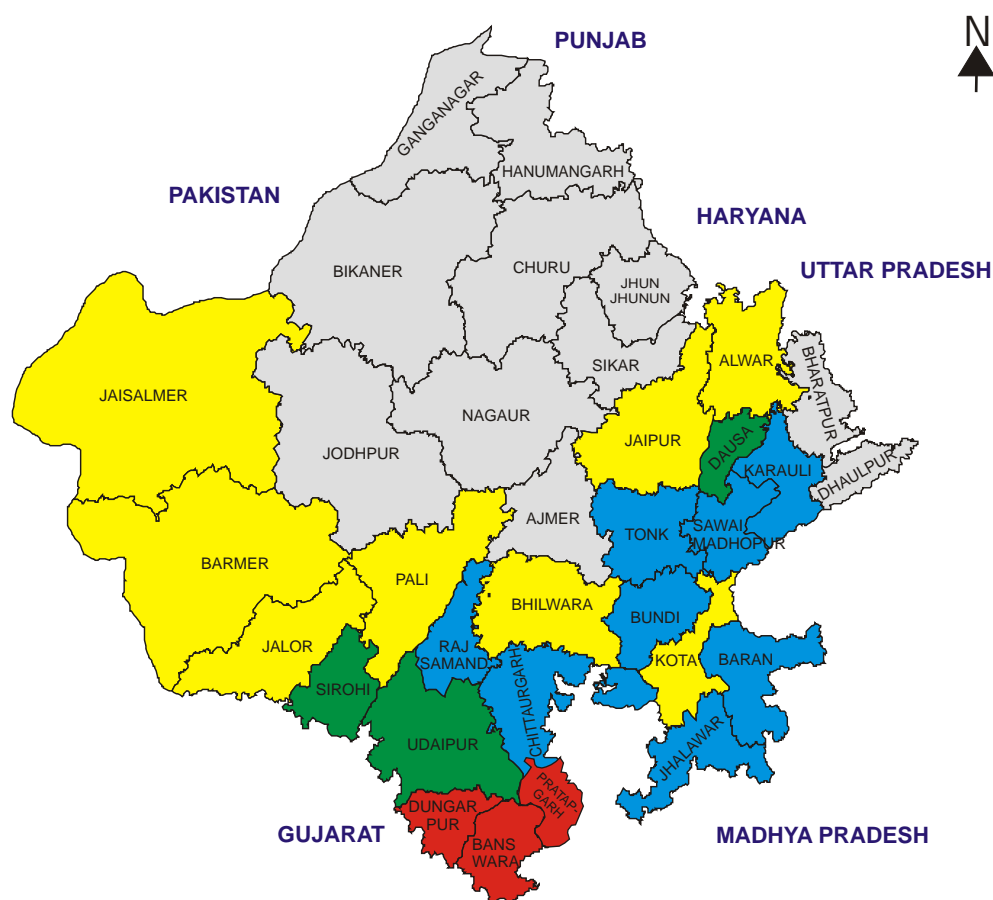

### Distribution of tribal population

According to census 2011, there are 17,87,715 tribal households in the state. Total tribal population in the state is 92,38,534 which included 47,42,943 males and 44,95,591 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 20.1 & 20.2). The

decadal growth rate of the ST population during 2001-2011 is 30.2 % which is higher than state's decadal growth rate (21.4%). The tribal population of Rajasthan forms 13.5% of state's total population and 8.9% of India's tribal population.

Rajasthan has 33 districts and the district wise tribal population is presented in Table 20.2. Districts with high tribal concentration i.e. more than 50% of district's total population, are Pratapgarh, Dungarpur and Banswara. In comparison, Sirohi and Udaipur have moderate tribal concentration i.e. 25-50% of district's total population (Map 20.1). Districts Udaipur, Banswara, and Dungarpur contribute about 40% to total tribal population of the state.

Overall sex ratio among tribals are 948. The child sex ratio is 921; it is lowest in Sawai Madhopur

## 21 SIKKIM

Sikkim state is situated in the north-eastern part of India. The area of the state is 7,096 km<sup>2</sup> which forms about 0.2% of country's total geographical area. The state lies between the latitude of 27°04'N and 28°07'N and longitude of 88°00'E and 88°55'E. The population density is 86 persons per km<sup>2</sup> and the recorded forest area of the state is 3,359 km<sup>2</sup> that constitutes 47.3% of its geographical area (Table 21.1).

### Distribution of tribal population

According to census 2011, there are 44,299 households in the state. The state's tribal population is 2,06,360 with 1,05,261 males and 1,01,099 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 21.1 & 21.2). The decadal growth rate of the tribal population during 2001-2011 is 85.2% which is higher than state's decadal growth rate (12.4%). The tribal population of Sikkim forms about 33.8% of state's total population and 0.2% of India's tribal population.

There are four districts in the state and district wise tribal population, sex ratios and literacy rates are presented in Table 21.2. The North district has the highest tribal concentration in the state which is about 65.7% of district's total population and remaining districts have the tribal concentration ranging from 25% to 50% (Map 21.1). The East district contributes 38% to total tribal population of the state.

Overall sex ratio among tribals are 961. The child sex ratio is 961; it is lowest in north district (926) and highest in East district (990). Overall literacy rate among tribals are 79.7% and among males and females, 85% and 75.3% respectively. It is lowest in North district (76.7%) and highest in East district (82.6%).

There are two scheduled tribes inhabiting the state. According to census 2001, Bhutias hold first position in terms of their population size (70,308) followed by Lepchas (40,568).

## 22 TAMIL NADU

Tamil Nadu is situated in southern part of the India. The area of the state is 130,058 km<sup>2</sup> which forms 3.96% of country's geographical area. The states lies between the latitude of 8°05'N and 13°03'N and longitude of 76°15'E and 80°20'E. The population density is 555 persons per km<sup>2</sup>. The recorded forest area of the state is 23,625 km<sup>2</sup> which constitutes 18.2% of its geographical area (Table 22.1).

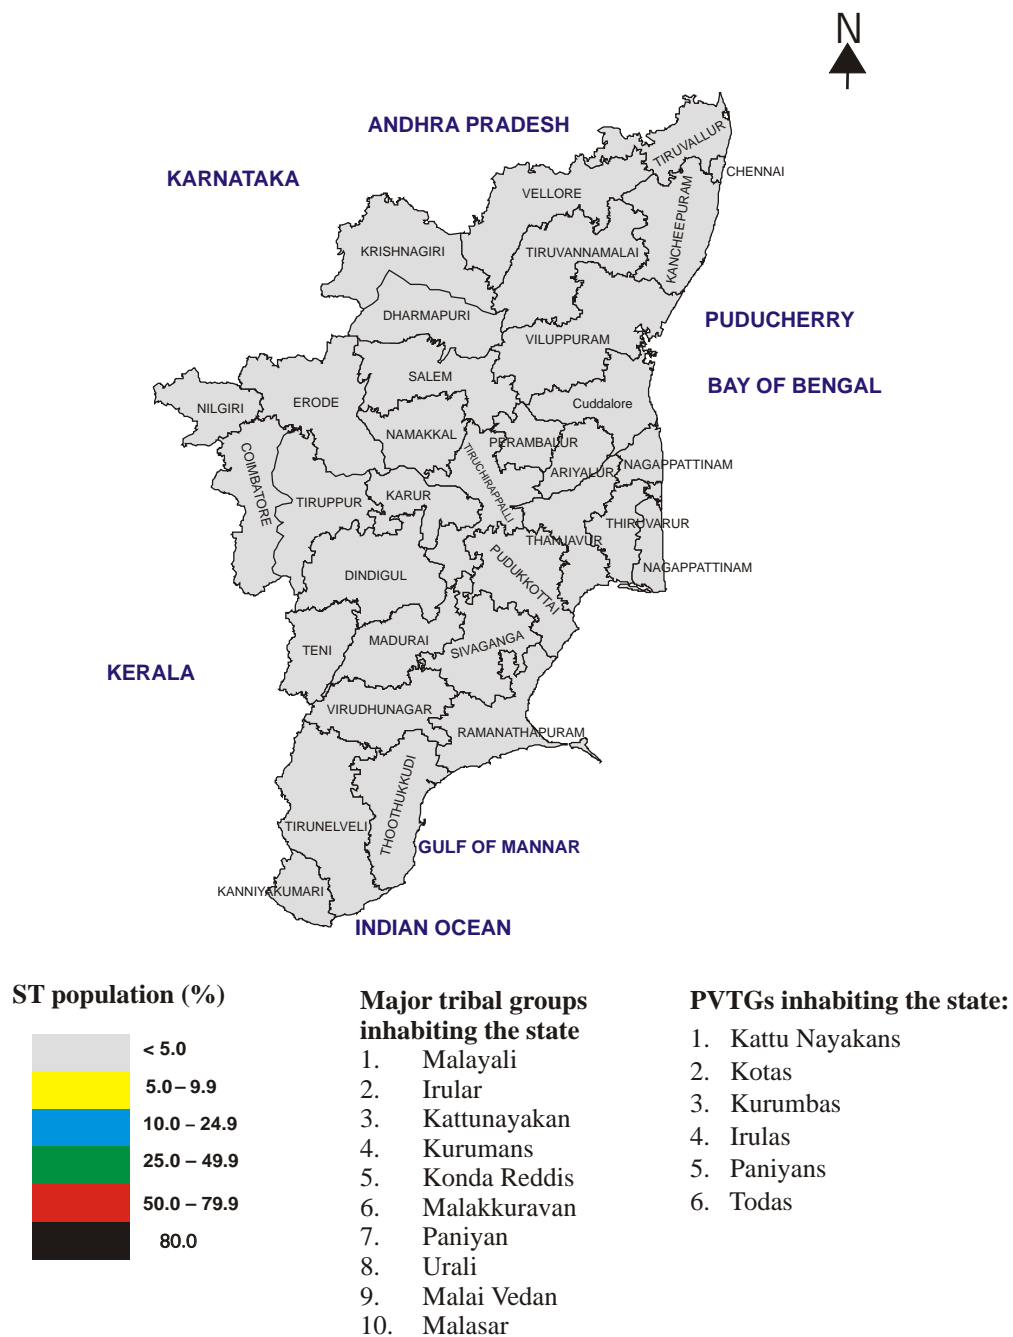

### Distribution of tribal population

According to census 2011, there are 1,96,373 tribal households in the state. Total tribal population in the state is 7,94,697 of which males and females are 4,01,068 and 3,93,629 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 22.1 & 22.2).

Source : nilgiris.nic.in

The decadal growth rate of the tribal population during 2001-2011 is 22% which is higher than state's decadal growth rate (15.6%). The tribal population of Tamil Nadu forms about 1.1% of state's total population and 0.8% of India's tribal population.

There are 32 districts in Tamil Nadu state. The district wise tribal population is presented in the Table 22.2. All districts have low tribal concentration i.e. less than 5% of district's total population (Map 22.1). Districts Salem, Tiruvannamalai, Vellore, and Dharmapuri contribute more than 40% to total tribal population of the state.

Overall sex ratio among tribals are 981 females per 1000 males. The child sex ratio is 918; it is lowest in Pudukkottai district (798) and highest in Sivaganga district (1120). Overall literacy rate among tribal are 54.3% and among males 61.8% and females 46.8% respectively. The literacy rate is low in Viluppuram district (44.4%) and high in Chennai district (84.5%).

There are 36 scheduled tribes inhabiting the state. Among them, six tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Malayalis hold first

## 23 TRIPURA

Tripura state is situated in north-eastern part of India and shares international border with Bangladesh from three sides - north, west and south. The area of the state is 10,491 km<sup>2</sup> which forms about 0.32% of country's geographical area. The state lies between the latitude of 22°57'N and 24°33'N and longitude of 91°10'E and 92°20'E. The population density of the state is 350 persons per km<sup>2</sup>. Its recorded forest area is 7,977 km<sup>2</sup> which constitutes about 76% of its total geographical area (Table 23.1).

### Distribution of tribal population

According to census 2011, there are 2,57,119 tribal households in the state. Total tribal population in the state is 11,66,813 with 5,88,327 males and 5,78,486 females. Age-sex distribution of total tribal and non-tribal population is presented in population pyramids (Figure 23.1 & 23.2). The decadal growth rate of the tribal population during 2001-2011 is 17.5%, which is higher than overall state's growth rate (14.8%). The tribal population of Tripura forms about 31.8% of state's total population and 1.12% of India's tribal population.

Currently, Tripura has four districts. Its district wise tribal population is presented in Table 23.2. The district with high tribal concentration, i.e. between 50-80% of district's total population, is Dhalai (Map 23.1). The remaining 3 districts have tribal population between 25-50% of district's total population. The West Tripura contributes 37% to total tribal population of the state.

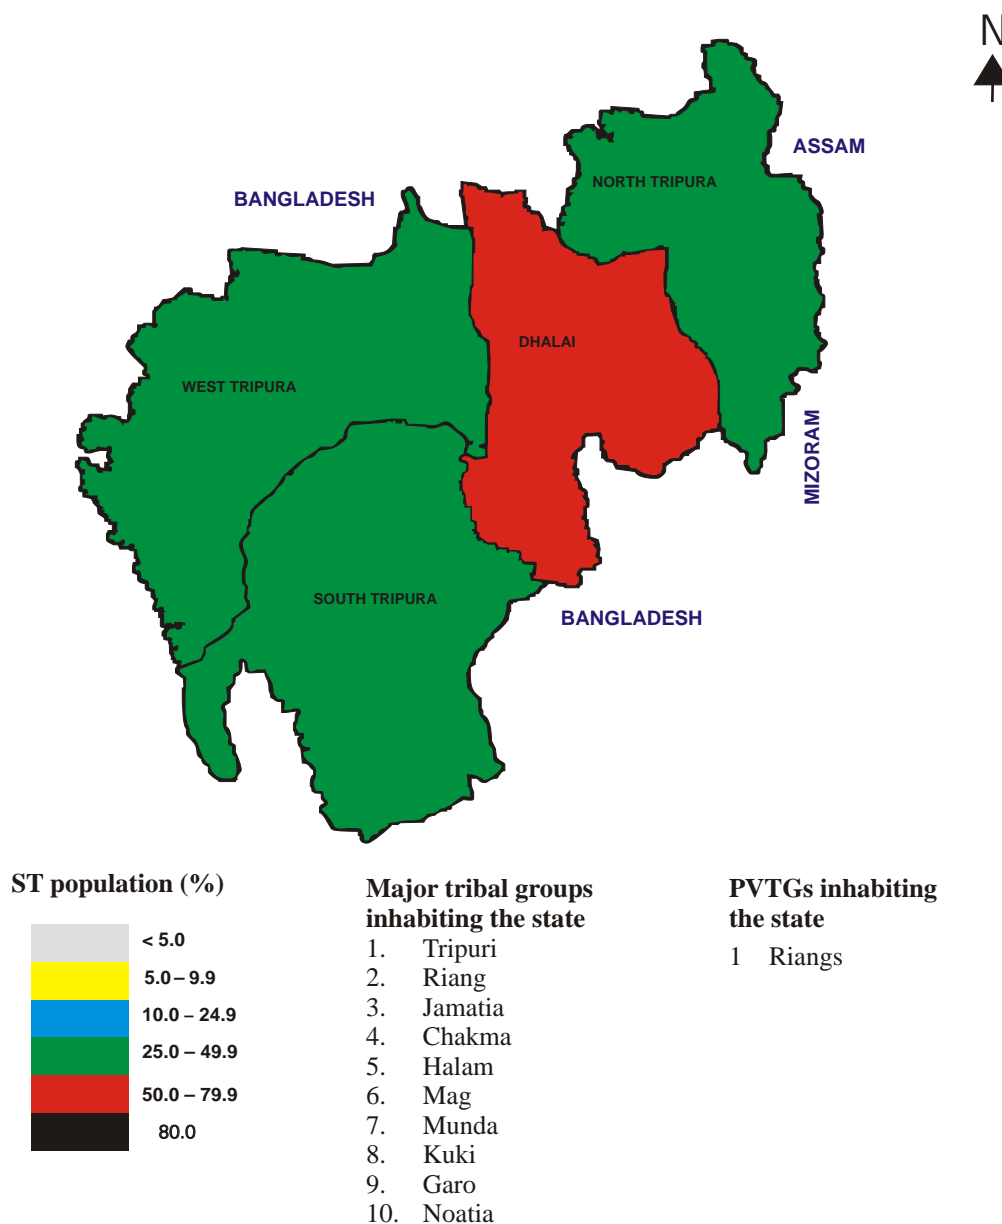

Overall sex ratio among tribals are 983. The child sex ratio is 957; it is lowest in West Tripura district (947) and highest in Dhalai district (973). Literacy rate among tribals are 79.1% and among males and females, 86.4% and 71.6% respectively. Literacy rates of all districts are above 70%. It is lowest in North Tripura district (74.8%) and highest in West Tripura district (83.1%).

There are 19 scheduled tribes inhabiting the state. Among them, one tribal community is notified as particularly vulnerable tribal group (PVTG). According to census 2001, Tripuris hold first position in terms of their population size (5,43,848) followed by the Riangs (1,65,103) and Jamatias (74,949).

## 24 UTTAR PRADESH

Uttar Pradesh the most populous state of India has geographical area of 2,40,928 Km<sup>2</sup> which constitutes about 7.3% of country's total area. It shares borders with nine states/Union Territory namely; Bihar, Jharkhand, Chhattisgarh, Madhya Pradesh, Rajasthan, Delhi, Haryana, Himachal Pradesh and Uttarakhand and international border with Nepal. Uttar Pradesh is situated in the latitude between 23°52'N-30°24'N and longitude between 77°05'E-84°38'E. The population density of the state is 829 persons per km<sup>2</sup>. The forest area of the state is 14,338 km<sup>2</sup> which is about 5.9% of its geographical area (Table 24.1).

### Distribution of tribal population

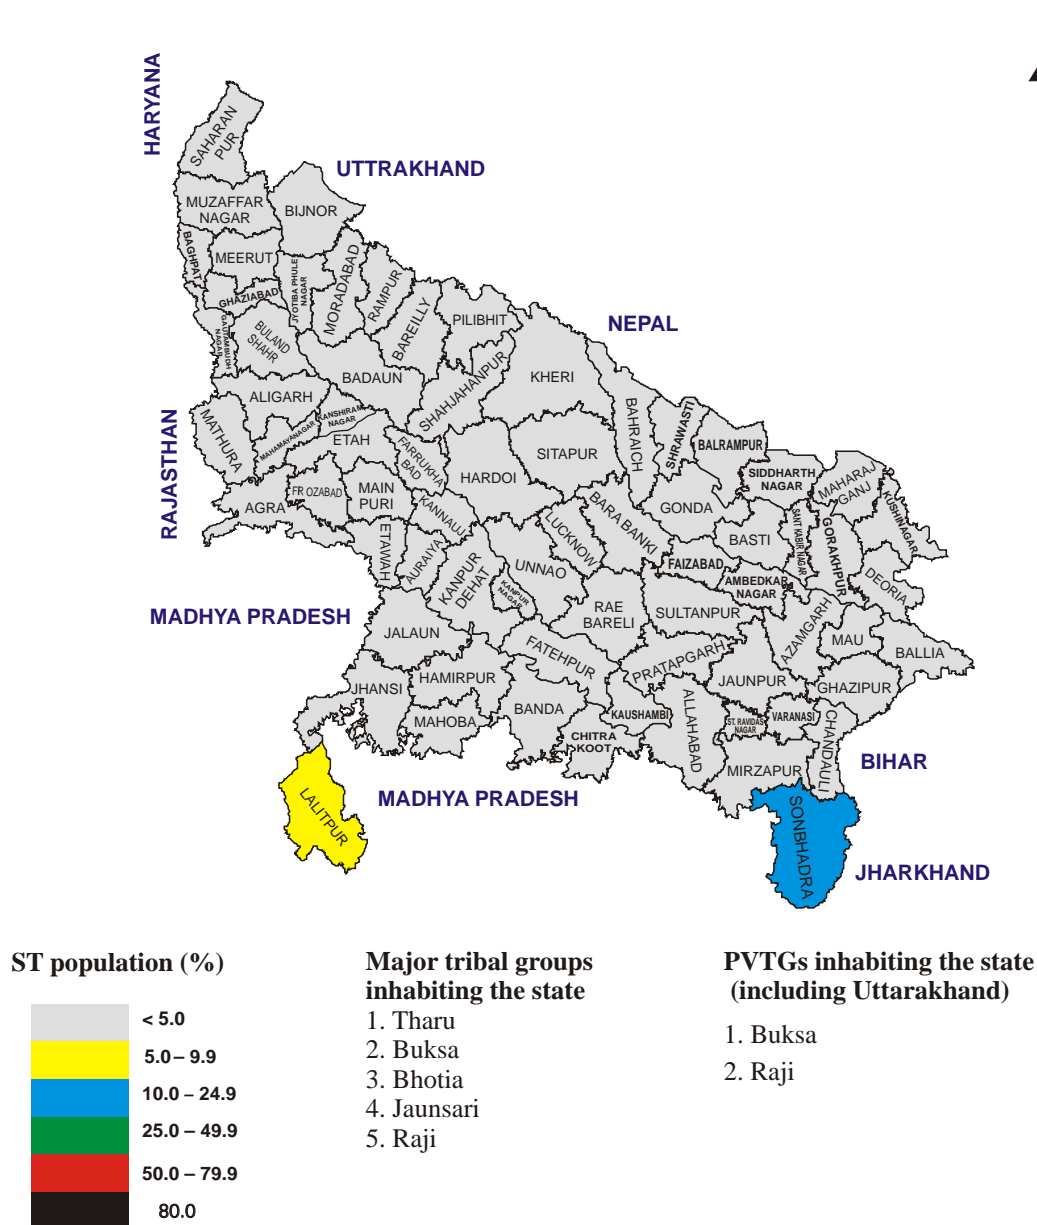

According to census 2011, there are 1,87,688 tribal households in the state. Total tribal population in the state is 11,34,273 with 5,81,083 males and 5,53,190 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 24.1 & 24.2). The decadal growth rate of the tribal population during 2001-2011 is 950.6% which is much higher than the state's decadal growth rate (20.1%). The tribal population of Uttar Pradesh forms 0.6% of state's total population and 1.1% of India's tribal population.

As per the census 2011, Uttar Pradesh has 71 districts. Its district wise tribal population is presented in Table 24.2. Sonbhadra district is only district that has the tribal concentration more than 25% of district's total population; district Lalitpur ranks second with 5.9% tribal concentration in the state (Map 24.1). About one-third of state tribal population reside in Sonbhadra districts.

Overall sex ratio among tribal is 952. The child sex ratio is 944; it is lowest in Baghpat district (500) and highest in Faizabad district (1304). Overall literacy rate among tribals are 55.7%; it is lowest in Kaushambi district (9.8%) and highest in Budaun district (88.5%). There is a large gap between male (67.1%) and female (43.7%) literacy rates.

There are five scheduled tribes inhabiting the state. Among them, two tribal communities are notified as particularly vulnerable tribal group (PVTG). According to census 2001, Tharus hold first position in terms of their population size (83,544) followed by the Buksas (4,367) and Bhotias (3,491).

## 25 UTTARAKHAND

Uttarakhand state is located in northern India from where two of the most sacred rivers namely the Ganga and the Yamuna originate. The state's geographical area is 53,483 km<sup>2</sup> which constitutes about 1.63% of the country's total area. It is situated in the latitude of 28°43'N - 31°28' N and longitude of 77°34'E - 81°03'E. The population density is 189 persons per km<sup>2</sup>. The forest area of the state is 24,496 km<sup>2</sup> which constitutes about 45.8% of its geographical area (Table 25.1).

### Distribution of tribal population

According to census 2011, there are 51,888 tribal households in the state. Total tribal population in the state is 2,91,903 of which 1,48,669 are males and 1,43,234 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 25.1 & 25.2). The decadal growth rate of the tribal population during 2001-2011 is 14% which is lower than state's decadal growth rate (19.2%). The tribal population of Uttarakhand forms 2.9% of state's total population and 0.28% of India's tribal population.

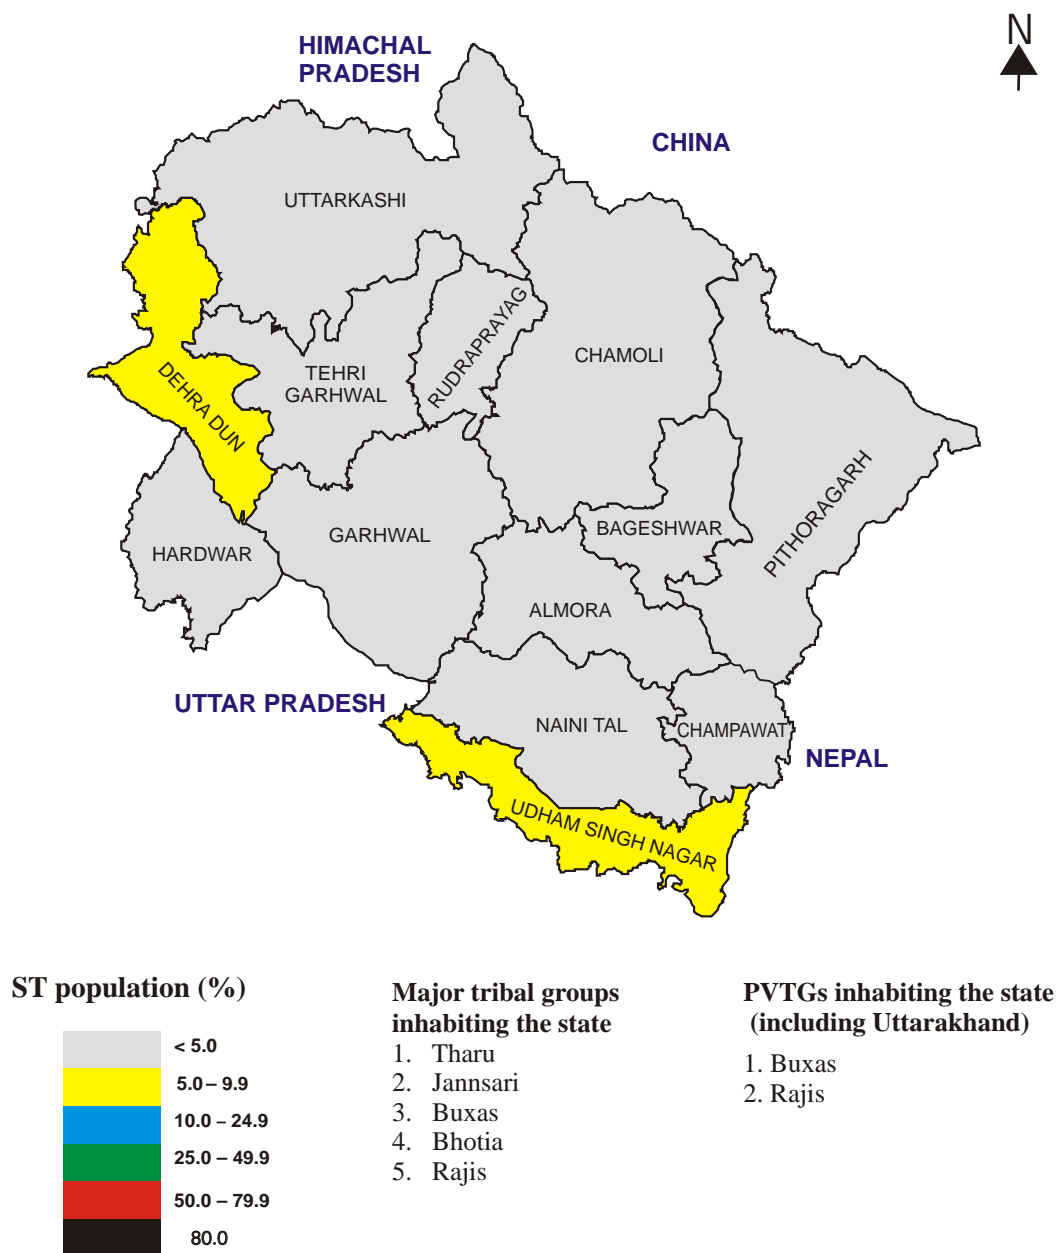

At present, there are 13 districts in the state. Its district wise tribal population is presented in Table 25.2. Two districts viz. Udham Singh Nagar (7.5%) and Dehradun (6.6%) have the highest tribal concentration in the state (Map 25.1). Udham Singh Nagar and Dehradun districts contribute about 80% to state total tribal population.

Overall sex ratio among tribals are 968. The child sex ratio is 929; it is lowest in Haridwar district (807) and highest in Garhwal district (1082). Literacy rate among tribals reported are 78.9%; it is 83.6% and 63.9% for males and females respectively. Literacy rate is lowest in Haridwar district (62.1%) and highest in Almora district (92.6%).

## 26 WEST BENGAL

West Bengal is a fourth most populous state that is situated in eastern part of India between 21°20' N and 27°32' N latitude and 85°50'E and 89°52'E longitude sharing international borders with Bangladesh, Nepal and Bhutan. Geographical area of the state is 88,752 km<sup>2</sup> which is 2.7% of the total area of the country. The state falls in the physiographic zones of Eastern Himalayas and the South Alluvial Gangetic Plains. The state has famous delta, Sundarbans. The population density of the state is 1028 persons per km<sup>2</sup>. The forest area of the state is 12,995 km<sup>2</sup> which constitutes about 14.6% of its geographical area (Table 26.1).

### Distribution of tribal population

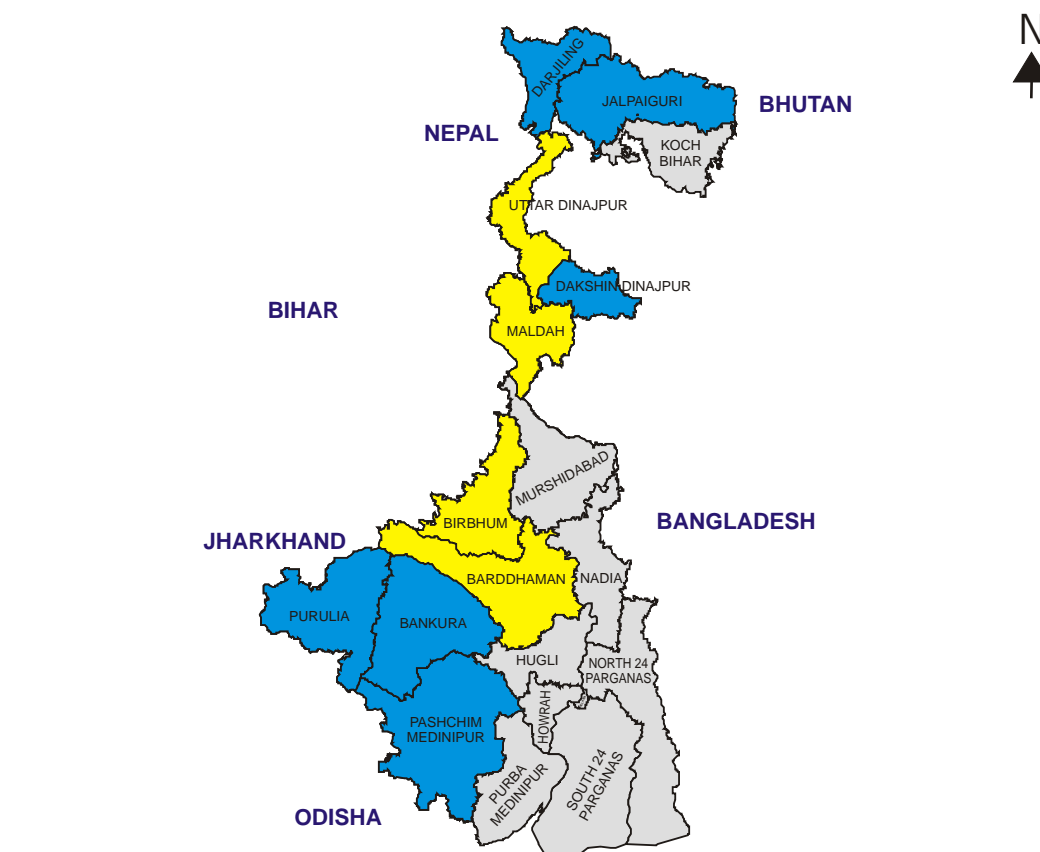

According to census 2011, there are 11,60,069 tribal households in the state. Total tribal population in the state is 52,96,953 including 26,49,974 males and 26,46,979 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 26.1 & 26.2). The decadal growth rate of the tribal population during 2001-2011 is 20.2 % which is higher than the state's decadal growth rate (13.9%). The tribal population of West Bengal forms 5.08% of state's total population and 5.1% of India's tribal population.

At present, West Bengal has 19 districts. Its district wise tribal population is presented in Table 26.2. Districts with high tribal population, i.e. 10-25% of district's total population are Puruliya,

Bankura, West Medinipur, Dakshi, Darjiling and Jalpaiguri (Map 26.1). The districts Paschim Medinipur, Jalpaiguri and Puruliya contribute about 40% to state total tribal population.

Overall sex ratio among tribal is 999. The child sex ratio is 974; it is lowest in Kolkata district (874) and highest in Birbhum district (1003). Literacy rate among tribals are 57.9%; it is highest in the Kolkata district (82.1%) and lowest in Uttar Dinajpur district (43.8%). In West Bengal a literacy gap exists between males (68.2%) and females (47.7%).

There are 38 scheduled tribes inhabiting the state. Among them, three tribal communities are notified as particularly vulnerable tribal group (PVTG). Numerically, Santals with a population of 22,80,540 (Census 2001) constitute the highest tribal population in West Bengal followed by the Oraons with a population of 6,17,138 and the Mundas with 3,41,542.

## DISTRIBUTION OF TRIBAL POPULATION IN THE UNION TERRITORIES

Jarwa woman  
Source: [survivalinternational.org](http://survivalinternational.org)

## 27 ANDAMAN & NICOBAR ISLANDS

The Andaman & Nicobar group of Islands is a union territory (UT) of India. These Islands situated at the juncture of the Bay of Bengal and Andaman sea. This union territory lies between the latitude of 6°N - 14°N and longitude of 92°E - 94°E. The total geographical area of the territory is 8,249 km<sup>2</sup>, constituting 0.25% of total geographical area of India. The population density of the state is 46 persons per km<sup>2</sup>. Forest area in the UT is 6,724 km<sup>2</sup>, which constitute 81.5% of geographical area of these Islands (Table 27.1).

### Distribution of tribal population

According to census 2011, there are 6910 households in these Islands. Total tribal population in the union territory is 28,530 of which males and females are 14,731 and 13,799 respectively. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 27.1 & 27.2). A negative decadal growth rate (-3.2%) is observed among the tribal population during 2001-2011, which is lower than the territory's decadal growth (6.7%). The tribal population of this territory forms about 7.5% total population and 0.03% of India's tribal population.

At present, there are three districts in the union territory. Its district wise tribal population is presented in Table 27.2. The Nicobar district has the highest tribal concentration in the territory i.e. 64.3% of district's total population followed by South Andaman (1.7%) and North & Middle Andaman district (0.7%) (Map 27.1). The district Nicobars contributes more than 80% to Islands total tribal population.

Overall sex ratio among tribals are 937. The child sex ratio is 955; it is lowest in North and Middle Andaman district (885) and highest in Nicobar district (959). Literacy rate among tribals are 75.6%; it is 80.9% among males and 69.9% among females. Literacy rate is relatively lower in Nicobar district (74.0%) and higher in South Andaman districts (84.0%).

There are six tribal communities inhabiting in the union territory. Among them five are notified as particularly vulnerable tribal groups (PVTG). According to census 2001, Nicobarese hold first position in terms of their population size (28,653) followed by the Shompens (398), Jarawas (240), Onges (96), Great Andamanese (43) and Sentinelese (39).

## 28 DADRA & NAGAR HAVELI

Dadra & Nagar Haveli is a union territory situated in western side of the foot hills of Western Ghats and lies between the latitude of 22°0'N and 20°25'N and longitude of 72°50'E and 73°15'E. It has an area of 491 km<sup>2</sup> and its population density is 698 persons per km<sup>2</sup>. The forest area of the territory is 211 km<sup>2</sup> which constitutes 42.9% of its geographical area (Table 28.1).

### Distribution of tribal population

According to census 2011, there are 32,640 tribal households in the territory. Total tribal population in the territory is 1,78,564 including 88,844 males and 89,720 females. Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 28.1 & 28.2). The decadal growth rate of the tribal population during 2001-2011 is 30.1% which is lower than territory's decadal growth (55.5%). The tribal population of Dadra & Nagar Haveli shares 52% of territory's total population (Map 28.1) and 0.17% of country's tribal population.

Overall sex ratio among tribal in the union territory is 1010. The child sex ratio is 977. Overall literacy rate among tribal is 61.9%, it is lower in females (50.3%) than males (73.6%). There is more than 20% literacy gap between males and females.

There are seven tribal communities inhabiting in the territory. According to the 2001 census, numerically, Varlis (90,847) is the dominant tribe in the territory, followed by Koknas (21,485), Dhodias (20,537), Dublas (2,779), Kali Dhors (1,341), Kathodis (213) and Naikdas (19).

## 29 DAMAN & DIU

Daman & Diu is a union territory situated in the Gujarat coast of the country. The geographical area of the union territory is about 112 km<sup>2</sup>. The population density is 2,168 persons per km<sup>2</sup>. The forest area of the territory is 6.15 km<sup>2</sup> which constitute 5.5% of its geographical area (Table 29.1).

### Distribution of tribal population

According to census 2011, there are 3,198 households in the territory. Total tribal population in the territory is 15,363 with 7,771 males and 7,592 females respectively (Table 29.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 29.1 & 29.2). The decadal growth rate of the ST population during 2001-2011 is reportedly 9.8% which is lower than territory's decadal growth (53.5%). The tribal population of Daman & Diu forms 6.3% of state's total population and 0.01% of India's tribal population.

This territory has two districts such as Daman & Diu. Daman district has the highest tribal concentration in the territory i.e. 7.97% of district's total population followed by Diu (0.24%) (Map 29.1).

Overall sex ratio among tribal is 977. The child sex ratio is 925; it is lowest in Diu district and highest in Daman district. Overall literacy rate among tribals are 78.8% and it is lower in Daman district (78.7%) and higher in Diu district (92.9%).

There are five tribal communities inhabiting the state. According to census 2001, the population of Dubla, Dhodia, Varli, Naikda and Siddi was 10366, 1925, 1485, 113 and 108 respectively.

## 30 LAKSHADWEEP

Lakshadweep is a group of Islands situated in the Arabian sea. This smallest union territory lies scattered between 8°15'N - 11°45'N latitude and 72°E - 74°E longitude. The area of the union territory is 32 km<sup>2</sup>. Its population density is 2,013 persons per km<sup>2</sup>. The forest area of the territory is 27.1 km<sup>2</sup> which constitutes 84.6% of its geographical area (Table 30.1).

### Distribution of tribal population

According to census 2011, there are 10,665 tribal households in the territory. Total tribal population in the union territory is 61,120 including 30,515 males and 30,605 females (Table 30.2). Age-sex distribution of total tribal and non-tribal population is presented in the population pyramids (Figure 30.1 & 30.2). The decadal growth rate of the tribal population during 2001-2011 is 20.2 % which is three times higher than the territory's decadal growth rate (6.2%). The tribal population of Lakshadweep forms 94.8% of territory's total population (Map 30.1) and 0.06% of India's tribal population. Besides, overall sex ratio among tribals is 1003 and child sex ratio is 907. Overall literacy rate among tribals are 91.7%; among males and females rates are 95.7% and 87.8% respectively.

Inhabitants of Lakshadweep whose both parents were born in Lakshadweep have been treated as scheduled tribes and hence individual tribal community wise figure is not available.

Figure 30.2: Age-sex pyramid for non-tribal population, Lakshadweep

## SUMMARY

The illustrated population characteristic shows that decadal growth rate of ST population is increasing at a steady rate and admittedly decadal growth is higher than the general population. However, a negative decadal growth rate during 2001-2011 is observed in Nagaland and Andaman & Nicobar Islands. Numerically the major share (67%) of the tribal population of the country is in the central belt which includes seven states viz. Madhya Pradesh, Chhattisgarh, Jharkhand, Maharashtra, Odisha, Rajasthan and Gujarat. The predominantly tribal states of the country (more than 50% of the total state population) are Arunachal Pradesh, Meghalaya, Mizoram, Nagaland and Union territories of Dadra & Nagar Haveli and Lakshadweep. Forest constitutes an important and integral part of their life and economy. It is worthwhile to mention that Madhya Pradesh accounts for the highest proportion of the forested area of the country and is also ranked first in terms of share of ST population in the nation. As per 2001 census, Bhils are the most populous tribe in terms of population size, followed by Gonds and Santhals. Tribal communities of India can be considered as a very closely knit society; however, it cannot be clubbed together as a simple homogeneous group.

The age structure of tribal population compared to non-tribal population is relatively young. The sex ratio (female/male) is better among the tribes compared to the national average. Sex composition among STs is nearly equal indicating that they are relatively less biased towards sex preference. The overall literacy among tribes are 59% and it is high in North Eastern states and Islands. It is low (around 50%) in Andhra Pradesh, Jammu & Kashmir, Madhya Pradesh, Bihar and Odisha. Further females are at a more disadvantageous position for literacy among STs nearly in almost all the States/UTs.

## ACKNOWLEDGEMENTS

The authors gratefully acknowledge Dr. V. M. Katoch, Secretary DHR, & DG, ICMR, New Delhi for his encouragement and constant support for preparation of this document. Thanks are due to Lt. Gen. D. Raghunath, Chairman, SAC, RMRCT, Jabalpur and Advisor, THRF, ICMR for his technical support and guidance.

We also thankfully acknowledge Dr. S. Rajasubramaniam, Editor, Tribal Health Bulletin for his valuable comments to improve this document. Sincere thanks to NIN, Hyderabad, RMRC, Bhubaneswar, RMRC, Port Blair, VCRC, Puducherry, Dr. Narendra Singh, Assam University, Assam, Dr. R.C. Mishra, RMRCT, Jabalpur for sharing tribal photographs. Thanks are also due to Dr. J. Roy, TO (A), RMRCT for editorial assistance. Mr. Mithun Vishwakarma of Tribal Health Research Unit of RMRCT deserve appreciations for providing secretarial assistance and for preparing the maps. The staff of Data Centre, RMRCT is also acknowledged for their help during data entry.
